

Download selected data from XNAT

Select the project as described in step 2, figure 1. Select "Download Images" to configure the download.

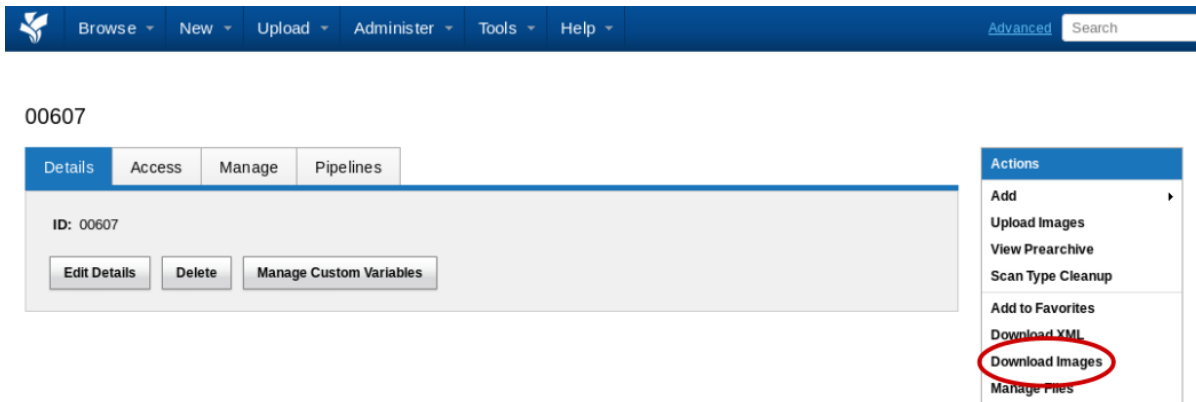

Figure 1: Select "Download Images".

Select the data to be downloaded e.g. NIFTI or log_files. After clicking on submit a ZIP-file will be created containing all data. This zip file should be stored and unpacked on our group drive for further processing.

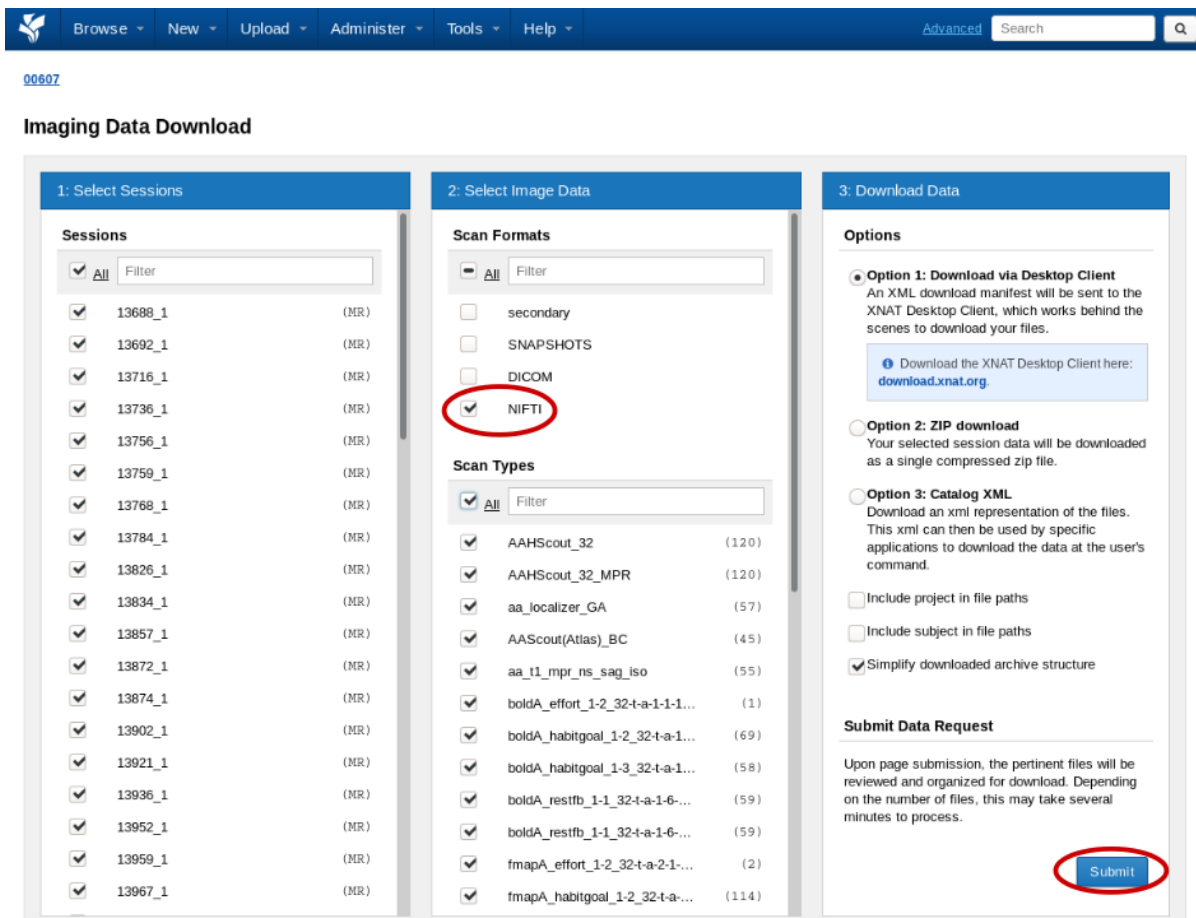

Figure 2: Choose subject and click "Review and Archive".
