JOIN THE RAMBØLL LIVEABLE CITIES LAB!

The Liveable Cities Lab is the new innovation and research laboratory of the Rambøll Group, directed by Herbert Dreiseitl, founder of the renowned urban design studio Atelier Dreiseitl. As an international think-tank we provide solutions to contemporary urban, environmental and social challenges through our unique Liveability approach. Our work addresses global challenges such as demographic change, urbanization and climate change through a multi- and transdisciplinary approach.

Building on over 30 years of experience in urban development, blue-green infrastructure and environmental integration, our services include project design, well-grounded expert input at all project stages as well as public involvement, using cutting-edge social technologies and art to build a shared, strong vision among stakeholders in urban development.

At the closest possible date we seek to employ a

**Landscape Architect**

*Full time*

at the Liveable Cities Lab in Überlingen, Germany.

The position is open to graduates as well as more experienced individuals with strong aesthetics, superior skills in drawing and swift 2D- and 3D-rendering abilities. A thorough understanding of urban planning and open-space design is required.

English is the main working language and must be spoken and written on a professional level. Other language skills as well as the willingness to learn basic German are a plus.

Please send your application including covering letter, CV, reference letters, and work samples to Markus Hartig, maha@ramboll.com
