

# Table of Contents

Preface	xi
Organization	xiii
 <i>Keynote papers</i>	
The future forces of change for the construction sector - a global perspective <i>R. Flanagan</i>	3
Vectors, visions and values <i>P.S. Brandon</i>	11
Help wanted: project information officer <i>T.M. Froese</i>	19
The next generation of eBusiness and eWork — what is needed for the systemic innovation? An executive summary of the EU supporting research and innovation. <i>B. Salmelin</i>	25
 <i>Product modelling technology</i>	
Virtual building maintenance: enhancing building maintenance using 3D-GIS and 3D laser scanner (VR) technology <i>V. Ahmed, Y. Arayici, A. Hamilton &amp; G. Aouad</i>	29
Supporting standard data model mappings <i>R.W. Amor</i>	35
Virtual building environments (VBE) — applying information modeling to buildings <i>V. Bazjanac</i>	41
A persistence interface for versioned object models <i>D.G. Beer, B. Firmenich, T. Richter &amp; K. Beucke</i>	49
Semantic parameterized interpretation: a new software architecture for conceptual design systems <i>A. Eir</i>	59
Harmonization of ISO 12006-2 and IFC - a necessary step towards interoperability <i>A. Ekholm</i>	67
A novel modelling approach for the exchange of CAD information in civil engineering <i>A. Firmenich</i>	77
Integration of product models with document-based information <i>T.M. Froese</i>	85

Aligning IFC with the emerging ISO10303 modular architecture. Can AEC community take advantages from it?	91
<i>R. Jardim-Gonçalves, F. Farinha &amp; A. Steiger-Garcao</i>	
Optimization of project processing in the steel construction domain	97
<i>E. Holtzhauer &amp; H. Saal</i>	
Location sensing for self-updating building models	103
<i>O. Icoglu &amp; A. Mahdavi</i>	
Modeling cast in place concrete construction alternatives with 4D CAD	109
<i>R.P.M. Jongeling, T. Olofsson &amp; M. Emborg</i>	
Pilot implementation of a requirements model	117
<i>A. Kiviniemi &amp; M. Fischer</i>	
A combined product-process model for building systems control	127
<i>A. Mahdavi</i>	
FIDE: XML-based data model for the spanish AEC sector	135
<i>J.M. Molina &amp; M. Martinez</i>	
A framework for concurrent structure analysis in building industry	141
<i>A. Niggel, R. Romberg, E. Rank, R.-P. Mundani &amp; H.-J. Bungartz</i>	
IFC supported distributed, dynamic & extensible construction products information models	149
<i>M. Nour &amp; K. Beucke</i>	
Product definition in collaborative building design and manufacturing environment	155
<i>H. Oumeziane, J.C. Bocquet &amp; P. Deshayes</i>	
Implementation of the ICT in the Slovenian AEC sector	161
<i>T. Pazlar, M. Dolenc &amp; J. Duhovnik</i>	
Adding sense to building modelling for code certification and advanced simulation	171
<i>I.A. Santos, F. Farinha, F. Hernández-Rodríguez &amp; G. Bravo-Aranda</i>	
Towards engineering on the grid	179
<i>Ž. Turk, M. Dolenc, J. Nabrzyski, P. Katranuschkov, E. Balaton, R. Balder &amp; M. Hannus</i>	
Managing long transactions in model server based collaboration	187
<i>M. Weise, P. Katranuschkov &amp; R.J. Scherer</i>	
A software generation process for user-centered dynamic building system models	195
<i>G. Zimmermann &amp; A. Metzger</i>	

## *Process modelling technology*

Embedded commissioning for building design	205
<i>Ö. Akin, M. T. Turkaslan-Bulbul, I. Gursel, J.H. Garrett Jr, B. Akinci &amp; H. Wang</i>	
The development of a technical office organization structure for enhancing performance and productivity in fast track construction projects	215
<i>T.A.H. Barakat, A.R.J. Dainty &amp; D.J. Edwards</i>	
Innovative production planning system for bespoke precast concrete products	223
<i>V. Benjaoran, N. Dawood &amp; R. Marasini</i>	

Process and information flow in mass customisation of multi-story housing <i>T. Olofsson, L. Stehn &amp; E. Cassel-Engqvist</i>	231
RoadSim: an integrated simulation system for road construction management <i>S. Castro &amp; N. Dawood</i>	237
Connet Turkey — gateway to construction in Europe <i>A. Dikbaş, S. Durusoy, H. Yaman, L. Tanagan &amp; E. Taş</i>	245
Modelling collaborative processes for Virtual Organisations in the building industry <i>M. Keller, P. Katranuschkov &amp; K. Menzel</i>	249
Process modelling in building engineering <i>M. König, A. Klinger &amp; V. Berkhahn</i>	257
Space competition on construction sites: assignment and quantification utilising 4D space planning tools <i>Z. Mallasi &amp; N Dawood</i>	263
Project planning: a novel approach through a universal e-engineering Hub - a case study of seismic risk analysis <i>G. Augenbroe, Z. Ren, C.J. Anumba, T.M. Hassan &amp; M. Mangini</i>	273
A decision support model for material supply management for the construction industry <i>J. Perdomo, W. Thabet &amp; R. Badinelli</i>	281
Modeling processes and processing product model information based on Petri Nets <i>U. Rueppel, U.F. Meissner &amp; S. Greb</i>	291
A building material information system: BMIS - in the context of CONNET-Turkey project <i>E. Taş, L. Tanaçan, H. Yaman &amp; A. Dikbaş</i>	297

## *Ontologies*

Managing changes in the AEC industry - how can ontologies help? <i>Q.Y. Cai &amp; F.F. Ng</i>	305
An ontology-driven approach for monitoring collaborative design knowledge <i>Y-C. Lai &amp; M. Carlsen</i>	311
Setting up the open semantic infrastructure for the construction sector in Europe - the FUNSIEC project <i>C. Lima, B. Fiès, C. Ferreira da Silva &amp; S. Barresi</i>	319
Practical use of the semantic web: lessons learned and opportunities found <i>R.V. Rees, W.V. Vegchel &amp; F. Tolman</i>	329
Supporting ontology management through self-describing concepts <i>T.E. El-Diraby</i>	337

## *eWork and eBusiness*

An assessment methodology for eBusiness and eCommerce in the AEC sector <i>A. Grilo, P Maló &amp; R. Jardim-Gonçalves</i>	349
The digital dormer - applying for building permits online <i>J.P. van Leeuwen, A.J. Jessurun &amp; E. de Wit</i>	355

An inquiry into building product information acquisition and processing <i>A. Mahdavi, G. Suter, S. Häusler &amp; S. Kernstock</i>	363
Usefulness and ease-of-use assessment of a project management tool for the construction industry <i>B. Otjacques, G. Barrère, F. Feltz &amp; M. Naaranoja</i>	371
Development and implementation of a functional architecture for an e-engineering Hub in construction <i>Z. Ren, C.J. Anumba, T.M. Hassan &amp; G. Augenbroe</i>	377
Legal and contractual issues - are they considered in RTD achievements <i>M.A. Shelbourn, T.M. Hassan &amp; C.D. Carter</i>	385
Modeling of ERP system solutions for the construction industry <i>M.O. Tatari, B-Y. Ryoo &amp; M.J. Skibniewski</i>	393
Construction informatics themes in the framework 5 programme <i>Ž. Turk</i>	399
 <i>Collaborative working</i>	
Virtual pools of resources eliminate idle or missing equipment in AEC companies <i>G. Antoniadis &amp; K. Menzel</i>	409
DIVERCITY: distributed virtual workspace for enhancing communication and collaboration within the construction industry <i>Y. Arayici &amp; G. Aouad</i>	415
Cooperation and product modelling systems <i>S. Blokpoel, R.P.M. Jongeling &amp; T. Olofsson</i>	423
Linking early design decisions across multiple disciplines <i>R. Drogemuller, J. Crawford &amp; S. Egan</i>	431
State of the art of the implementation of Information Management Systems in the construction industry in Spain <i>N. Forcada, M. Casals &amp; X. Roca</i>	437
Agent-enabled Peer-To-Peer infrastructure for cross-company teamwork <i>A. Gehre, P. Katranuschkov &amp; R.J. Scherer</i>	445
Virtual communities: design for collaboration and knowledge creation <i>I.L. Kondratova &amp; I. Goldfarb</i>	453
The design framework - a web environment for collaborative design in the building industry <i>M. Huhn</i>	461
Collaborative work practices in Turkey, five case studies <i>A. Sanal</i>	467
Architecture for collaborative business process management - enabling dynamic collaboration <i>R. Zang, O. Adam, A. Hofer, C. Hammer, M. Jerrentrup &amp; S. Leinenbach</i>	475
Comprehensive information exchange for the construction industry <i>J. Díaz</i>	483

## *Mobile computing*

- Mapping site processes for the introduction of mobile IT 491  
*S.L. Bowden, A. Dorr, A. Thorpe & C.J. Anumba*
- Mobile field data entry for concrete quality control information 499  
*I.L. Kondratova*
- Issues of context sensitivity in mobile computing: restrictions and challenges in the construction sector 505  
*K. Menzel, K. Eisenblätter & M. Keller*
- A context based communication system for construction 515  
*D. Rebolj, A. Magdič & N. Č. Babič*
- MOBIKO — mobile cooperation in the construction industry based on wireless technology 521  
*R. Steinmann*

## *Knowledge management*

- Support for requirement traceability in design computing: an integrated approach with building data modeling 529  
*I. Özkaya & Ö. Akin*
- Interlinking unstructured text information with model-based project data: an approach to product model based information mining 539  
*S.-E. Schapke & R.J. Scherer*
- Live capture and reuse of project knowledge in construction: a proposed strategy 547  
*C.E. Udeaja, J.M. Kamara, P.M. Carrillo, C.J. Anumba, N. Bouchlaghem & H. Tan*
- Development of product family structure for high-rise residential buildings using industry foundation classes 553  
*T. Wallmark & M.M. Tseng*

## *Construction site and project management*

- Assistance to building construction coordination by images 563  
*R. Kubicki, G. Halin & J.-C. Bignon*
- Gesprecons: eSafety and risk prevention in the construction sector 569  
*J.M. Molina, M. Martínez & I. García*
- Intelligent Construction Sites (ICSs) 577  
*T. Mills, Y. Jung & W. Thabet*
- Organizational point of view for the use of information technology in construction projects 583  
*P. Praper*
- Virtual reality at the building site: investigating how the VR model is experienced and its practical applicability 587  
*S. Woksepp, O. Tullberg & T. Olofsson*
- Evaluating competitiveness in construction industry: an alternative frame 595  
*A.Y. Toprakli, A. Dikba & Y. Sey*

## *Seismic risk and environmental management*

Analyses of Izmit earthquake by means of remotely sensed data: a case study, Yalova city 603  
*S. Kaya, F. Bektas, C. Goksel & E. Saroglu*

Do phased Environmental Management Systems actually benefit SMEs? 609  
*L.L. Hopkinson & C. Snow*

Software based knowledge integration for seismic risk management 615  
*R. Pellegrini & P. Salvaneschi*

Real-time earthquake prediction algorithms 621  
*S. Radeva, R.J. Scherer & D. Radev*

## *IT supported architectural design*

Hybrid approach to solve space planning problems in building services 629  
*G. Bi & B. Medjdoub*

A computational architectural design approach based on fractals at early design phases 635  
*Ö. Ediz & G. Çağdaş*

APSYS architectural plan layout generator by exhaustive search 641  
*B. Kisacikoglu & G. Çağdaş*

Architectural parametric design and mass customization 649  
*S. Boer & K. Oosterhuis*

A model for hierarchical floorplan geometries based on shape functions 657  
*G. Zimmermann & G. Suter*

## *E-learning and education*

Parametric representation of functional building elements with reference to architectural education 665  
*M. Aygün & I. Çetiner*

Life long learning for improved product and process modeling support 667  
*P. Christiansson*

E-learning with puzzle collages 675  
*C-H. Lin, T-W. Chang, L-C. Yang & S-C. Chen*

Author index 681
