

Table of contents

Preface

ECPPM 2008 Organisation

Keynote papers

Advanced ICT under the 7th EU R&D Framework Programme: Opportunities for the AEC/FM industry
E. Filos

Anatomy of a cogitative building
A. Mahdavi

Model-based management tools and systems

Erection of in-situ cast concrete frameworks - model development and simulation of construction activities
R. Larsson

An Information Management System for Monitoring of Geotechnical Engineering Structures
G.Faschingbauer & R. Scherer

MACE: shared ontology - based network for architectural education
E. Arlati, E. Bogani, M. Casals & A. Fuertes

Future Directions For The Use of IT in Commercial management of Construction Projects
M. Sarshar, P. Ghodous & A.Connolly

A Process Model for Structural Identification
P. Kripakaran, S. Saitta & I. F. C. Smith

A trust-based dashboard to manage building construction activity
A. Guerriero, G. Halin, S. Kubicki & S. Beurné

ICT based modeling supporting instrumentation for steering design processes
A. Laaroussi, A. Zarli & G. Halin

Semantic Support for Construction Process Management in Virtual Organisation Environments
A. Gehre, P. Katranuschkov & R. J. Scherer

Building information modelling and ontologies

Virtual Organisation Environments
H.M. Böhms, P. Bonsma, M. Bourdeau & F. Josefiak

A simple, neutral building data model
W. Keilholz, B. Ferries, F. Andrieux & J. Noel

SAR Design with IFC

E. Turkyilmaz & G. Yazici

Using geometrical and topological modeling approaches in building information modeling

N. Paul & A. Borrmann

A comparative analysis of the performance of different (BIM/IFC) exchange formats

M. Nour

Going BIM in a Commercial World

M. Bew, J. Underwood, J. Wix & G. Storer

Mapping between architectural and structural aspects in the IFC based building information models

T. Pazlar, R. Klinc & Ž. Turk

eServices and SOA for Model-driven cooperation in AEC

A distributed portal-based platform for construction supply chain interoperability

C.P. Cheng, K.H. Law & H. Bjornsson

Model-based eServices for supporting cooperative practices in AEC

S. Kubicki, A. Guerriero & G. Halin

Development of an e-service for semantic interoperability of BIMs

A. Tibaut & D. Rebolj

Integrating IFC Product Data Services in Distributed Portal-Based Design Environments

R. Windisch

Industrialised production

Simulation of construction logistics in outfitting processes

J. K. Voigtmann & H.-J. Bargstädt

A review on intelligent construction and its possible impacts on the industry

A. Dikbaş & C. Taneri

Design with architectural objects in industrialised house-building

A. Ekholm & F. Wikberg

Data, Information and Knowledge management, methods and tools

Modelling the living building life-cycle

S. v. Nederveen & W. Gielingh

Virtual testing laboratory for FIDE compliant software

S. Garrido, S. Muñoz & R. Gregori

Project information management: Proposed framework and comparison with the 1COBIT framework

T. M. Froese

Evaluating the integrative function of ERP systems used within the construction industry

U. Acikalin, M. Kuruoglu, U. Isikdag & J. Underwood

Semantic representation of product requirements for true product knowledge management

G. Bravo-Aranda, F. Hernández-Rodríguez & A. Martín-Navarro

HyperUrban: Information and Communication driven Design Era

K. Zreik

On AEC query formulation techniques

T. Cerovsek

Semantic annotation and sharing of text information in AEC/FM

S.-E. Schapke & R.J. Scherer

Value-driven processes and value-chain management

3D Building Model-Based Life-Cycle Management of Reinforced Concrete Bridges

M. Kluth, A. Borrmann, E. Rank, T. Mayer & P. Schiessl

Decision Support in Petri Nets via Genetic Algorithms

F. Hofmann, V. Berkhahn & P. Milbradt

Consistent Reconciliation of Divergent Project Schedules Under Semantic & Functional Constraints

V.A. Semenov, S.V. Morozov, O.A. Tarlapan, H. Jones & A.V. Semenova

Architect's Decision Station and Its Integration with Project-driven Supply Chains

E. Conte, G.E. Kersten & R. Vahidov

e-Quality & e-Site - Immediate Tangible Benefits for a Building and Construction Sector SME

M. Mihelič

Human interaction implementation in workflow of Construction & Building SMEs

G. Balčiūnaitis, V. Čiumanovas & R. Gricius

Robust Process-based Multi-Project Scheduling for Construction Projects in Vietnam

L.Q. Hanh & U. Rüppel

BauVOGrid: A Grid-based Platform for the Virtual Organisation in Construction

P. Katranuschkov

Smart Buildings and intelligent automation services (control, diagnosis, self-maintenance and adaptation, AAL,...)

Context-adaptive building information for disaster management

T. Wießflecker, T. Bernoulli, G. Glanzer, R. Schütz & U. Walder

Spaces meet users in virtual reality

E. Nykänen, J. Porkka & H. Kotilainen

User interfaces for building systems control: from requirements to prototype

.C. Chien & A. Mahdavi

Non-intrusive sensing for PDA-based assistance of elderly persons

J. Finat, M. A. Laguna & J. A. Gonzalez

A feed forward scheme for building systems control

A. Mahdavi, S. Dervishi & K. Orehounig

User-system interaction models in the context of building automation

A. Mahdavi & C. Pröglhöf

Multiple model structural control and simulation of seismic response of structures

A. Ichtev, R. J. Scherer & S. Radeva

Models and ICT applications for resource efficiency

Use of BIM and GIS to enable climatic adaptations of buildings

E. Hjelseth & T. K. Thiis

Base case data exchange requirements to support thermal analysis of curtain walls

J. Wong, J. Plume & P.C. Thomas

REEB: a European-led initiative for a strategic research roadmap to ICT enabled energy-efficiency in construction

A. Zarli & M. Bourdeau

IFC-based calculation of the Flemish Energy Performance Standard.

R. Verstraeten, P. Pauwels, R. De Meyer, W. Meeus, J. Van Campenhout & G. Lateur

Methodologies, repositories and ICT-based applications for eRegulations & code compliance checking

Towards an ontology-based approach for formalizing expert knowledge in the conformity-checking model in construction

A. Yurchyshyna, A. Zarli, C. Faron Zucker & N. Le Thanh

Modeling and simulation of individually controlled zones in open-plan offices – a case study

G. Zimmermann

Using constraints to validate and check building information models

J. Wix, N. Nisbet & T. Liebich

On line services to monitor the HQE® construction operations

S. Maïssa & B. Vinot

Innovation and standards

EU- project STAND-INN-Integration of standards for sustainable construction into business processes using BIM/IFC

S. E. Haagenrud, L. Bjørkhaug, J. Wix, W. Trinius & P. Huovila

B.I.M. Towards design documentation: experimental application work-flow to match national and proprietary standards

E. Arlati, L. Roberti & S. Tarantino

New demands in construction – a stakeholder requirement analysis

J. Ye, T. M. Hassan, C.D. Carter & L. Kemp

IFC Certification process and data exchange problems

A. Kiviniemi

Semantic Intelligent contents, best practices and industrial cases

A strategic knowledge transfer from research projects in the field of tunneling

N. Forcada, M. Casals, A. Fuerte, Marta Gangoellis & Xavier Roca

Mixed approach for SMARTlearning of buildingSMART

E. Hjelseth

Implementation of an IFD Library using Semantic Web Technologies: A Case Study

F. Shayeganfar, A. Mahdavi, G. Suter & A. Anjomshoaa

Representation of caves in a shield tunnel product model

N. Yabuki

Innovative R&D in Philosophical Doctorates

4D model based automated construction activity monitoring

D. Rebolj, P. Podbreznik & N. Č. Babič

Knowledge enabled collaborative engineering in AEC

R. Costa, P. Maló, C. Piddington & G. Gautier

A method for maintenance plan arbitration in buildings facilities management

F. Taillandier, R. Bonetto & G. Sauce

Factors affecting virtual organisation adoption and diffusion in industry

A. Abuelma'Atti & Y. Rezgui

Current & future RTD trends in Modelling and ICT in Ireland

Towards a framework for capturing and sharing construction project knowledge

B. Graham, K. Thomas & D. Gahan

The evaluation of health and safety training through e-learning

M. Carney, J. Wall, E. Acar, E. Öney-Yazıcı, F. McNamee & P. McNamee

Implementing eCommerce in the Irish construction industry

A.V. Hore & R.P. West

CoSpaces

Mobile maintenance workspaces: Solving unforeseen events on construction sites more efficiently

E. Hinrichs, M. Bassanino, C. Piddington, G. Gautier, F. Khosrowshahi, T. Fernando & J.O. Skjærbæk

Futuristic design review in the construction industry

G. Gautier, C. Piddington, M. Bassanino, T. Fernando & J. Skjærbæk

Workshop: InPro

Integrating use case definitions for IFC developments

M. Weise, T. Liebich & J. Wix

The COMMUNIC Project Virtual prototyping for infrastructure design and concurrent engineering

E. Lebègue

Decomposition of BIM objects for scheduling and 4D simulation

J. Tulke, M. Nour & K. Beucke

From building information models to semantic process driven interoperability: the Journey continues

Y. Rezgui, S.C. Boddy, G.S. Cooper, M. Wetherill

Workshop: e-NVISION

E-Procurement future scenario for European construction SMEs

R. Gatautis & E. Vitkauskaitė

e-NVISION e-Business ontology for the construction sector

V. Sánchez & S. Bilbao

General approach to e-NVISION scenarios

M. Tarka

e-Tendering – the business scenario for the e-NVISION platform

G. Balčiūnaitis, V. Čiumanovas & R. Gricius

Towards a digitalization of site events: envisioning eSite business services

B. Charvier & A. Anfosso
