

Table of contents

Preface	XI
Organisation	XIII
<i>1 Product modelling</i>	
Towards integrated construction technical documents — A new approach through product modelling <i>A. Mokhtar & C. Bedard</i>	3
Managing design data: Including CAD in integrated environments <i>T. Liebich</i>	11
Modelling of generic document structures and the development of an integrated document data environment <i>S.G. Armstrong & S. R. Lockley</i>	19
Modeling and integrating design data from experts in a CAAD environment <i>P.C. Lockemann, J. Mülle, R. Sturm & V. Hovestadt</i>	29
Building product model for life cycle applications <i>N. Kohler & J.R. Bedell</i>	35
Requirements on standardised building product data models <i>M. Hannus, K. Karstila & V. Tarandi</i>	43
Strategy for computer integrated design construction and technology <i>A. K. Munns, Y.B. Li & A.A. Lookman</i>	51
Product modelling in CAD system for reinforcement design <i>D. Žlajpah, A. Knific, V. Ljubič & J. Duhovnik</i>	59
Static models and dynamic designs –An empirical impasse vs an inductive solution <i>M. Ramscar</i>	69
Metamodel for buildings <i>P. Richter & C. Richter</i>	77
Representation of product data models that evolve during the design process <i>H. Werner & W. Kowalczyk</i>	83

Concurrent knowledge based engineering: Strategic issues in product modelling for the construction industry <i>S. N. Papantonopoulos, R. P.G. Barlow & G. N. Fisher</i>	91
Context-oriented modeling of Eurocodes <i>E. Condamin, R. J. Scherer, J. H. Garrett Jr & H. Kiliccote</i>	95
Integration of models: From experience of GSD group to the definition of French reference models <i>B. Ferries, J. P. Bedrune, A. M. Dubois & J.C. Mangin</i>	103
Product modelling for application <i>R. Junge, T. Liebich & E. Ammermann</i>	111
Mappings: The glue in an integrated system <i>R.W. Amor & J. Hosking</i>	117
Operation mapping or how to get the right data? <i>A. Bijnen</i>	125
Modeling civil engineering constraints with inter-object relationships <i>A. Bergmann, T. Bode, A. B. Cremers & W. Reddig</i>	131
A view-dependent model for acoustics in building design with a communication purpose <i>J.-L. Monceyron, P. Poyet & J. Beaumont</i>	139
Hierarchical aggregation form of steel skeleton <i>M. Heinisuo & J. Hyvärinen</i>	147
Feature based product model for steel structures <i>H.-W. Haller & H. Saal</i>	155
Product modelling in steel construction <i>M. Huhn</i>	163
Data exchange of 3D building models based on STEP <i>W. R. Haas</i>	167
Relationship modelling in design of diesel power plants <i>P. Paasiala, A. Aatronen, K. Tanskanen & A. Riitahuhta</i>	173
How can specifications be handled as entities and objects by computer? <i>P. Toms</i>	181
 <i>2 Design process modelling</i>	
Resolving conflicts as knowledge evolves <i>I. F. C. Smith</i>	191
Multi agent driven cooperative product development <i>H. Grabowski & R. Schreiner</i>	199
Using self-organising objects for design <i>M. Hauser & R. J. Scherer</i>	207

Site influence and rules for steel structures optimal design <i>M. Sellami, A. F. Cutting-Decelle & -J.C. Mangin</i>	213
Fundamentals of optimal computer projecting of construction foundations <i>V. P. Dyba, S. I. Evtushenko, V.V. Shmatkov & A. Y. Murzenko</i>	219
Product and process modelling of production and assembling of reinforcement <i>B. Dolinšek & J. Duhovnik</i>	225
Simulation of the communication process <i>B. de Vries & L. J. Somers</i>	233
The need and requirements for project performance models <i>L. F. Alarcón C. & D. B. Ashley</i>	237
Modelling project team strategies in construction projects <i>L. F. Alarcón C. & D. B. Ashley</i>	245
Activity models of the architectural design: Application to concurrent multiengineering <i>L. Adolphe</i>	253
A prototype tool to schedule and simulate the house refurbishment process <i>C. Glardon, N. Kohler & Th. M. Liebling</i>	257
Document centered approach to design process modeling <i>Ž. Turk</i>	265
Integration of project management system and objectoriented product model <i>D. S. Tzanev</i>	273
 <i>3 Automation in construction and facility management</i>	
Minimal procurable units as objects in construction process modelling <i>J. Bröchner</i>	281
Capturing semantic data in CAD for construction project planning <i>J. H. M. Tah, R. Howes & P. Iosifidis</i>	287
A conceptual model of construction scheduling activity based on the application protocol format <i>Q. Zhong, K. W. Tham & .K S. Mathur</i>	295
A run time generation of construction plans: Integrating construction information model with building model <i>M. Alshawi & Z. Hassan</i>	303
Development of a defect prediction prototype expert system for the housing industry <i>Z. Ahmed</i>	309
Conformity control of building materials based on realistic stochastic models <i>L. R. Taerwe</i>	317
Field support using mobile computing <i>N. Diehl</i>	325

An automated meta-database system and its application in construction management <i>Li-Guo Wang & A. K. Munns</i>	333
The application of an automated meta-network system in construction management <i>Li-Guo Wang & A. K. Munns</i>	341
Evaluation of three different methods concerning the crane coverage problem <i>K. Lennerts, E. Gehbauer & L. Petersson</i>	349
Sustainable information systems for project management <i>C. E. V. Thomas, S. P. R. Vincent & T. C. Cornick</i>	357
STEP conforming integrated facility management <i>F. Cheng, P. Patel, F. Evans, S. Bancroft & E. Robbens</i>	365
Object Manager - A CAE-tool for buildings in operation <i>U. Rüppel, U. Meißner & G. Nitsche</i>	371
Software analysis of a flexible object-oriented facility management system <i>J.N.W. Bos</i>	379
System analysis and design of a building product model for the total building management <i>K. Menzel</i>	387
 <i>4 Integrated environments</i>	
Modelling requirements for integrated building design systems <i>M. Sun & S. R. Lockley</i>	395
STEP-based information systems in integrated environments — A case study <i>S. Schwarz</i>	403
Integrated predictive modelling — Strategic research programme of building research establishment <i>D. P. Bloomfield, F. Parand & F. Cheng</i>	407
RETE _x — A design environment to support integral design <i>C. Hertkorn & S. Heitz</i>	413
The MARITIME AP Factory: A modelling environment for application protocols <i>W. de Bruijn, J. Høyte & C. Onneken</i>	419
Product and process modelling in the OPTIMA project <i>F. Schmidt & H. Bach</i>	427
Object-oriented data model in project OPTIMA <i>C. Volle & R. Rühle</i>	435
Simulation-design — Operation of building HVAC-systems <i>G. Knabe & A. Rathey</i>	441
Building management data acquisition using a product model based design process <i>M. Hinkelmann, M. Kopf & M. Madjidi</i>	449
Broadband integrated communications for construction <i>A. Thorpe, A. Baldwin, C. Carter, D. Leever & D. Madigan</i>	457

5 European projects

The EU project ATLAS

ATLAS implementation scenario <i>R. Greening & M. Edwards</i>	467
The ATLAS models <i>F. Tolman & P. Poyet</i>	473
ATLAS integration tools <i>P. Poyet</i>	479

The EU project CIMSTEEL

CIMSTEEL integration standards <i>A. Watson & A. Crowley</i>	491
CIMSTEEL prototypes: 1 and 2 <i>C. Fimbel</i>	495
CIMSTEEL prototype: 3 <i>A. Watson & G. Knowles</i>	497

The EU project COMBI

EU-project COMBI - Objectives and overview <i>R. J. Scherer</i>	503
COMBI: Integrated product model <i>P. Katranuschkov</i>	511
COMBI: Knowledge-based tool for preliminary structural design <i>M. Hauser & D. Sandner</i>	521
EP4.4 COMBI: KB-tool for foundation design <i>M. Mangini, G. Varosio & E. Parker</i>	529
Project COMBI: Integrated structural analysis <i>B. Protosaltis</i>	537

The EU project COMBINE

An overview of the COMBINE project <i>G. Augenbroe</i>	547
Conceptual modelling approaches in the COMBINE project <i>A. M. Dubois, J. Flynn, M. H. G. Verhoef & G. L. M. Augenbroe</i>	555
The COMBINE Data Exchange System <i>S. R. Lockley, W. Th. Rombouts & W. Plokker</i>	567
COMBINE follow-ups <i>G. Augenbroe</i>	577

The EU project ROCCO

ROCCO - Robot assembly system for computer integrated construction, an overview <i>F. Gebhart & T. Bock</i>	583
A semi-autonomous vehicle for a mobile robot (ROCCO) <i>Th. Bock & H. F. Steffani</i>	591
A fault tolerant assembly tool for the masonry robot system ROCCO <i>J. Andres</i>	599
Author index	605
