Dear partners,

ESTP Paris is very happy to inform you that from September 2019, non-French speaking students may be able to attend a full Master's program taught in English at ESTP Paris, on the Campus of Cachan.

The major "Civil engineering" will include the courses of the French majors "Bâtiment" and "Travaux publics", but will be taught in English by professors from ESTP and from our partner universities. Whether international students may come to study for a semester, a full academic year or even towards the Engineering Master's degree, this program may enable Non-French speakers to follow the full curriculum of ESTP Paris in English.

These courses will be added to the list of courses already taught in English across the other majors.

You will find the curriculum with courses involved in the attachment hereafter.

This program of excellence will gather both non French-speaking students willing to come study at ESTP Paris, but also some of our best French students selected on the basis of their academic results and their level of English.

The international students will therefore be part of an enriching group made of students from all over the world.

French Language for Engineers will be part of the programme, with a course of French as a foreign language, taking place on a weekly basis, with several levels, from absolute beginner to higher level.

Should you need more information, please do not hesitate to contact me.

Best regards

Emmanuel HUGON
