

Development of a Modern Higher Education System for Water Engineering in Syria

EU-TEMPUS PROJECT EDUWAT

6th Workshop

Plauen, June 30th – July 4th 2014

Inter and External Dissemination

**Abdel Naser Aldarir
Department of Rural Engineering
Faculty of Agriculture
Aleppo University**

Dissemination planning provides an opportunity for dissemination goals, strategies, and activities to be conceptualized and carefully considered.

- ✓ conferences,
- ✓ workshops,
- ✓ academic courses,
- ✓ meetings,
- ✓ computer-based discussion lists
- reports,
- journal articles,
- video tapes,
- newsletters, and
- websites

The approach for dissemination is the exploitation of EDUWAT results, as well as to establish a critical mass around the project and increase the number of members in the Trust in new education system.

The following groups have been identified as EDUWAT project stakeholders:

- Ministry of High Education
- state Universities
- Private Universities
- Higher Institutes
- Intermediate Institutes
- Ministry of Irrigation and water resources
- Ministry of Agriculture and Land Reform
- Ministry of Environment
- Engineers Syndicate
- Agricultural Engineers Association
- Regional Organisations
- Academic Research Centers
- Non Governmental Organizations
- Suppliers of digital information
- National and regional information services

Dissemination within the project (internal Dissemination):

Project partners themselves are involved in the dissemination process in order to foster awareness for the project, especially in their own universities or offices.

The Universities will be the first target group of dissemination of the results of this project and be included entirely into the internal exchange of plans, tools, practice and results from Project.

Internal dissemination activities address the students and staff from Universities, Ministries, Organisations, and others.

Internal communication between project partners to communicate various activities, recent trips, meetings and information between project partners and any other suggestions. This can be achieved by:

- Electronic mailing lists (Currently this includes members of the project team) , although there may be advantages to establishing a new list.
- The internal dissemination of the project results will be ensured by posting them on a private website.
- Working Groups.
- Printed publications:
 - EDUWAT may to print copies of some information and materials.
 - EDUWAT has to plan to hold a series of dissemination events specifically aimed at the end of the project.
 - Developing a publications programme about EDUWAT, and its activities .

External Dissemination

- The project has created a website (www.eduwat.eu), which should inform interested parties about the activities. Where necessary, documents may be accommodated on password protected pages.
- Instructional literature derived from experience across EDUWAT. for disseminating material (seminars, workshops, conferences).
- All recruitment (newspapers, journals, magazines, websites or newsletters) carry aim and results of the project.
- Contact with European Universities.

- ❖ **Who will disseminate the results of the EDUWAT project?**
- ❖ **At this time due to the current circumstances in Syria can't apply any of these points!**

Thank you

Danke
