

To strengthen our dedicated Speech and Language Technology team in Berlin we are looking for

Student Assistants (m/f/o)

(20 hours per week for 3 months)

The Speech and Language Technology Lab at DFKI Berlin is involved in numerous national as well as international research programmes and networks. We offer an interesting and flexible work environment as part of an innovative, international and enthusiastic team which coordinates and participates in national as well as European projects in the wider area of Natural Language Processing and Language Technology.

Task:

- › Evaluating climate-related claims against scientific publications to determine their accuracy.

Your profile:

- › Master student in Environmental Sciences, Climate Studies, or similar.
- › Very good knowledge in theoretical aspects of climate research is required.
- › Excellent command of English.
- › Comfortable with reading and comprehending scholarly articles.
- › Good time management skills, attention to detail, and analytical skills.
- › Experience in manual data annotation and/or fact-checking is a plus.
- › Excellent command of German is a plus.

Your benefits:

- › Contribution to a large project in Natural Language Processing and AI with international visibility.
- › Contribution to combating misinformation about climate change on social media platforms.
- › Collaboration with a team of experts in Natural Language Processing and AI working on data-driven solutions for improving climate change discourse online.
- › Remote work with flexible hours.

We look forward to your application (including CV, current transcript, examples of your hands-on experience is a plus but not required) including earliest possible starting date. Please send your application via email to Georg Rehm (georg.rehm@dfki.de). This job ad is open until all vacant positions are filled.

The German Research Center for Artificial Intelligence (DFKI) is Germany's leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized "Centers of Excellence" and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the proportion of women in science and therefore expressly invites women to apply.
