### Message from the Guest Editors

Dear Colleagues,

The principles of a sustainable development include the design of human systems, taking into account ecological and social limits of carrying capacity and scientific principles. Environmental performance is important for guiding sustainable consumption and sustainable production and value chains. Focusing on environmental performance in a qualitative and/or quantitative way organizations and companies raise awareness to environmental or sustainable issues to foster change toward sustainability.

Thus, effective risk assessment and analysis of sustainability risks are necessary as well and should be part of sustainability reporting. While SGDs are increasingly integrated into sustainability reporting, sustainability risks report rarely find integration. Thus, it is of pivotal interest to identify how risk disclosure takes place in sustainability reporting.

This Special Issue invites various scholars to explore research from different perspectives offering new insights into creative approaches and systemic thinking as well as innovative processes for dealing with the sustainability impact, risk disclosure, and environmental performance in sustainability reports.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
