Faculty and staff

The School of Economics has more than 100 faculty members, of which professional teachers account for about 80%, professors account for about 15% and associate professors account for about 40%. Among the professional teachers, more than 80% have an educational background of studying abroad for more than one year.

The college hired a number of outstanding overseas scholars such as Professor Justin Yifu Lin, the dean of the Institute of New Structural Economics of Peking University, Professor Robert C Merton of the Massachusetts Institute of Technology, the winner of the 1997 Nobel Prize in economics, Professor Vladimir L. Kvint of Moscow University, the academician of the Russian Academy of Sciences, to provide support for the undergraduate and graduate training of the School of economics.

The college has also hired more than 60 senior professionals from financial, trade, industrial and commercial institutions and government departments to serve as off-campus tutors of the college, so as to realize the combination of IAR to cultivate students.

Student

After the implementation of large-scale enrollment in Shanghai University, the school now has more than 600 undergraduates, more than 700 masters and doctoral students, and more than 370 international students from different countries and regions. The school has two all-English undergraduate majors in International Economics and Trade and Economics, two all-English professional master's majors in Finance and International Business, and an all-English academic master's major in International Trade.

INTERNATIONAL COOPERATION

The School of Economics actively develops cooperation and exchanges with domestic and foreign universities. In terms of international exchanges, our school has established teacher-student exchange and academic exchange relationships with famous business schools in Europe, Russia and other regions or countries. In terms of academic exchanges, the school regularly invites well-known foreign scholars to come to our school to give academic lectures, sponsors young teachers to participate in high-level academic conferences at home and abroad; dispatches teachers to foreign universities to teach economics and management courses, and conduct short-term lectures or cooperative research.

At present, the School of Economics has established cooperative relations with more than 50 overseas universities. Every year, the School of Economics welcomes or participates in the reception of foreign scholars and university representatives from more than 20 countries and regions, including Russia, the United States, Australia, the United Kingdom, France, Italy, Germany, Finland, Argentina, Romania, etc., to discuss cooperation in joint research, teacher-student exchanges, lecture teaching and other cooperation content, expand the space for international cooperation, enhance the overseas reputation of our school, and enhance the school's external influence.
