Information on the "**optional modules**"

In the 2nd and 3rd semesters, you have to choose at least one of the 2 following modules:

Application in Technology (composed of Microsystems Technology in the summer term and Applied Bionanotechnology in the winter term)

Application in Biomedicine (composed of Materials in Biomedicine in the summer term and Biomedical Tissue Engineering in the winter term)

You are also free to attend both lectures and even to register for both examinations – if so, in the end you choose the best module grade for being taken into account in your average master's grade; the grade(s) of the other module can be listed on your certificate under "additional topic".

If you make your choice for one of the 2 modules in the summer term, please note that this module has to be continued in the 3rd semester; one cannot for example take Application in Technology in one semester and Application in Biomedicine in the other semester.

Compulsory course (part of both Module Application in Technology and Application in Biomedicine):

Seminar "Public and economic aspects of Bioengineering": in winter term 2026/2027
