

Summer School E&T 2024 for International Doctoral Students or Young Researchers

EcoEduTech Oasis: Nurturing Minds with Green, Educational, Digital Harmony, and a Journey Back to Nature

"EcoEduTech" is a portmanteau of "Eco" (representing **ecology** or **environmental sustainability**), "Edu" (indicating **education**), and "Tech" (referring to **technology**). It signifies the intersection of ecological principles, educational practices, and technological advancements. EcoEduTech Summer School aims to integrate educational technology settings to promote environmental awareness, sustainability, and a holistic understanding of the natural world. EcoEduTech Summer School also encourages students to engage in field trips and nature exploration for supporting tourism education. EcoEduTech Summer School involves global collaboration, connecting students, educators, and practitioners from around the world to share insights, projects, and solutions related to **Ecology, Education, and Technology**.
