

Module number	Module name	Module coordinator
PHF-LLM-IP-1	Patent Law and Allied Rights	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess comprehensive knowledge and competences in the field of intellectual property law, in particular in the sub-field of patent law and its ancillary fields. The students will be able to classify various issues and problems accordingly and to find a solution taking into account the subject of the protection, scope of protection, limitations and sanctions of patent law. They will be capable of presenting their own solutions to cases in English.	
Content	The contents of this module cover the fundamentals of patent law with European and international references as well as practical references to fundamentals of other subfields of intellectual property law, copyright law and data law.	
Teaching and learning methods	2 hours per week (SWS) lecture, 1 hour per week (SWS) exercise course, self-study According to § 6 paragraph 7 of the study regulations, the participation in the exercise course is limited to a maximum of 25 participants.	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises an examination paper of 90 minutes in duration. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the winter semester.	
Workload	The workload comprises 150 hours in total.	
Module duration	The module runs for the duration of one semester.	

Module number	Module name	Module coordinator
PHF-LLM-IP-2	EU Copyright Law	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess comprehensive knowledge and competences in copyright law and will be able to establish and correctly classify references to it. They are going to be familiar with the basic structures and contents of copyright law shaped by Union law with its international references and, from a comparative legal perspective, with exemplary arrangements chosen by national legislations. They will be able to develop and present their own solutions to cases in English.	
Content	The contents of the module cover the fundamentals of European copyright law as well as references to the fundamentals of intellectual property law and data law.	
Teaching and learning methods	2 hours per week (SWS) lecture, 1 hour per week (SWS) exercise course, self-study According to § 6 paragraph 7 of the study regulations, the participation in the exercise course is limited to a maximum of 25 participants.	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises an examination paper of 90 minutes in duration. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the winter semester.	
Workload	The workload comprises 150 hours in total.	
Module duration	The module runs for the duration of one semester.	

Module number	Module name	Module coordinator
PHF-LLM-IP-7	Trademark and Design Law and Allied Rights	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess comprehensive knowledge and competences in the field of intellectual property law, in particular in the subfields of European trademark and design law. They will be familiar with the basic structures and contents of the fields of law shaped by Union law and, from a comparative legal perspective, with exemplary arrangements chosen by national legislations. The students will be able to classify various issues and problems accordingly and to find a solution to cases taking into account the object of protection, scope of protection, limitations and sanctions of the respective subfield. They will be capable of presenting their own solutions to cases in English.	
Content	The contents of the module cover the fundamentals of trademark and design law – in each case with European and international references – as well as practical references to the fundamentals of other subfields of intellectual property law, copyright law and data law.	
Teaching and learning methods	2 hours per week (SWS) lecture, 1 hour per week (SWS) exercise course, self-study According to § 6 paragraph 7 of the study regulations, the participation in the exercise course is limited to a maximum of 25 participants.	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is required.

Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises an examination paper of 90 minutes in duration. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the summer semester.	
Workload	The workload comprises 150 hours in total.	
Module duration	The module runs for the duration of one semester.	

Module number	Module name	Module coordinator
PHF-LLM-IP-14	Fundamentals of Research in European and International IP Law	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will be able to recognize the nature and benefits of scientific work and to quickly and unerringly gain an overview of the state of the scientific discussion in a subject field. They will be capable of discussing the scientific views of others and to present this in good scientific practice in a form that is comprehensible to others. Furthermore, they will possess the competence to conduct targeted research on a scientific topic, taking into account a wide range of sources, such as the library, the Internet and databases, and to prepare information scientifically for written assignments, such as term papers, portfolios and the final thesis. Moreover, they will possess basic knowledge and competences in European Community Law and its references to intellectual property law and business law. In addition, students have gained a basic knowledge of the national language in order to cope with everyday life in the place of study.	
Content	The contents of the module cover the fundamentals of academic work, such as choosing and finding a topic, searching for, procuring and selecting literature, generating a bibliography, structuring an academic paper, and legal citation techniques, as well as the fundamentals of European Community law, taking into account business law. In addition, the fundamentals of the language of the country of the study visit or of another language are part of the content of the module.	
Teaching and learning methods	1 hour per week (SWS) lecture, 1 hour per week (SWS) exercise course, 1 hour per week (SWS) tutorial, 2 hours per week (SWS) seminar, 2 hours per week (SWS) language course, self-study	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is required.	
Applicability	The module is a compulsory module in the postgraduate Master's program International Studies in Intellectual Property Law and Data Law.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a non-graded public oral examination of 45 minutes in duration. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module examination is assessed as "passed" or "failed".	
Module frequency	The module is offered each semester.	

Workload	The workload comprises 150 hours in total.
Module duration	The module runs for the duration of one semester.

Module number	Module name	Module coordinator
PHF-LLM-IP-13	Internship IP Law & Data Law	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will have an insight into the practical activities of companies, organizations, courts or chambers in the field of intellectual property and data law. They will be able to apply theoretical knowledge in practice and find solutions to the specific problems that arise here.	
Content	The contents of the module comprise knowledge of institutions, companies and industries as well as application-related knowledge in the field of intellectual property and data law.	
Teaching and learning methods	The module includes an internship in the amount of one month, whereat the practical training period should last at least four weeks.	
Prerequisites	Solid basic legal knowledge in the field of civil law and public law is required, which corresponds in scope and level to the knowledge of a graduate of a law school or the holder of an adequate foreign law degree.	
Applicability	The module is a compulsory module in the postgraduate Master's program International Studies in Intellectual Property Law and Data Law.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a portfolio in the amount of 30 hours.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each semester.	
Workload	The workload comprises 150 hours in total.	
Module duration	The module runs for the duration of one semester.	

Module number	Module name	Module coordinator
PHF-LLM-IP-3	Copyright and Patent Law in Practice	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will have in-depth insights into the application of intellectual property law and its enforcement in practice.	
Content	The contents of the module cover the issues relevant to the application and enforcement of copyright and patent law in practice for courts, patent attorneys and attorneys-at-law, companies, registration authorities and the media as well as general questions of intellectual property rights. The content of the module includes, in particular, substantive regulations on sanctions in the case of infringement of law as well as procedural questions of law enforcement and the drafting of licensing agreements.	
Teaching and learning methods	3 hours per week (SWS) lecture, self-study	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is presupposed. Furthermore, basic knowledge in the field of intellectual property law, in particular patent and copyright law as well as the corresponding ancillary fields is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a portfolio in the amount of 50 hours. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the winter semester.	
Workload	The workload comprises 150 hours in total.	
Module duration	The module runs for the duration of one semester.	

Module number	Module name	Module coordinator
PHF-LLM-IP-9	Trademark-, Design- and Data Law in practice	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess in-depth insights into the application of intellectual property law and its enforcement in practice.	
Content	The contents of the module cover the issues relevant to the application and enforcement of trademark and design law in practice for registration authorities, courts, patent attorneys and attorneys-at-law, as well as companies, and general issues of intellectual property law. The content of the module includes, in particular, substantive regulations on sanctions in the case of infringements of law as well as procedural questions of law enforcement and the drafting of licensing agreements.	
Teaching and learning methods	3 hours per week (SWS) lecture, self-study	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is presupposed. Furthermore, basic knowledge in the field of intellectual property law, in particular trademark, design and data law as well as the corresponding ancillary fields is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a portfolio in the amount of 50 hours. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the summer semester.	
Workload	The workload comprises 150 hours in total.	
Module duration	The module runs for the duration of one semester.	

Module number	Module name	Module coordinator
PHF-LLM-IP-4	Current Issues in Soft IP Law	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess the competence to independently work on complex questions of copyright, trademark and design law as well as the corresponding ancillary fields using jurisprudential methods. They will be able to assess their relevance for legal practice and have an overview of current research questions in intellectual property law in the examined subfields as well as of literature and case law on a selected research topic.	
Content	The contents of the module cover specialized or current issues arising from the point of view of a specific legal system, for instance German or another national law, in the field of copyright, trademark and design law and the corresponding ancillary fields. In addition, references to the fundamentals of other subfields of intellectual property law and data law are established.	
Teaching and learning methods	2 hours per week (SWS) seminar, self-study In accordance with § 6 paragraph 7 of the study regulations, the participation in the seminar is limited to a maximum of 15 participants.	
Prerequisites	Knowledge of civil law and public at the level of a first university degree in law is presupposed. Furthermore, basic knowledge in the field of intellectual property law, in particular copyright, trademark and design law as well as the corresponding ancillary fields is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a public oral examination of 45 minutes in duration as an individual examination or a term paper in the amount of 90 hours or a combined term paper in the amount of 90 hours. The type of the examination is determined in each case before the start of the semester and announced in the usual way by the faculty. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the winter semester.	

Workload	The workload comprises 150 hours in total.
Module duration	The module runs for the duration of one semester.

Module number	Module name	Module coordinator
PHF-LLM-IP-5	Current Issues in Hard IP Law	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess the competence to independently work on complex questions of the field of intellectual property law, in particular of patent law, employee invention law and plant variety protection law using jurisprudential methods. Students will also be able to assess the questions relevance for legal practice. They will have gained an overview over current research questions in intellectual property law in the examined subfields and will have profoundly studied the literature and case law on a selected research topic.	
Content	The contents of the module cover specialized issues arising with regard to specific technologies, including biotechnology, digitalization, artificial intelligence, or in specific sectors, including the pharmaceutical industry, or from the perspective of a specific legal system, for example German or other national laws, in the field of patent law and the corresponding ancillary fields. Further contents consist of the fundamentals of other subfields of intellectual property law and data law.	
Teaching and learning methods	2 hours per week (SWS) seminar, self-study	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is presupposed. Furthermore, basic knowledge in the field of intellectual property law, in particular patent law and the corresponding ancillary fields is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	
Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a public oral examination of 45 minutes in duration as an individual examination or a term paper in the amount of 90 hours or a combined term paper in the amount of 90 hours. The type of the examination is determined in each case before the beginning of the semester and announced in the usual way by the faculty. The language of the examination is English.	
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.	
Module frequency	The module is offered each year in the winter semester.	

Workload	The workload comprises 150 hours in total.
Module duration	The module runs for the duration of one semester.

Module number	Module name	Module coordinator
PHF-LLM-IP-6	IP and Negotiation	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess in depth-knowledge and competences regarding the enforcement of intellectual property rights in the field of industrial property (in particular patent, trademark and design rights) in contractual negotiations and lawsuits in courts and registration authorities. The students will be able to classify a concrete issue under different legal aspects and to find a solution that is in line with the interests of the parties taking into consideration the object of protection, scope of protection, sanctions and procedural requirements. They will be capable of presenting their own solutions to cases in English.	
Content	The contents of the module cover the legal validity proceeding and the enforcement of intellectual property rights in application proceedings, contract negotiations and/or lawsuits in courts or registration authorities as well as the substantive, procedural and strategic fundamentals necessary therefore. In addition, the practical applicability for written elaborations, including pleadings, drafts of judgments or contracts, in individual or group work, as well as situations re-enacting practice, for example a simulated court hearing or contract negotiation is part of the content of the module.	
Teaching and learning methods	2 hours per week (SWS) seminar, self study . The courses are held in English or German. This is determined in each case at the beginning of the semester by the lecturer and announced in the usual way by the faculty. The courses can be supplemented or partially replaced by e-learning offers. This will be determined by the lecturer at the beginning of the semester and announced in the usual way by the faculty. In accordance to § 6 paragraph 7 of the study regulations, the participation in the seminar is limited to 15 participants.	
Prerequisites	Knowledge of civil law and public law at the level of a first university degree in law is presupposed. Furthermore, basic knowledge in the field of intellectual property law and the corresponding ancillary fields is required.	
Applicability	In the postgraduate Master's program International Studies in Intellectual Property Law and Data Law, the module is one of twelve compulsory elective modules, of which at least seven must be chosen. In this context, at least three of the modules Patent Law and Allied Rights, EU Copyright Law, Trademark and Design Law and Allied Rights as well as Data Law must be selected.	

Requirements for earning credit points	Credit points are awarded upon passing the module examination. The module examination comprises a complex activity in the amount of 100 hours or a public oral examination of 45 minutes in duration as an individual examination or a term paper in the amount of 90 hours or a combined term paper in the amount of 90 hours. The type of the examination is determined in each case before the beginning of the semester and announced in the usual way by the faculty. The language of the examination corresponds to the language of instruction.
Credit points and grades	The module is worth 5 credit points. The module grade corresponds to the grade of the examined assessment.
Module frequency	The module is offered each year in the winter semester.
Workload	The workload comprises 150 hours in total.
Module duration	The module runs for the duration of one semester.

Module number	Module name	Module coordinator
PHF-LLM-IP-10	Industrial Property Specialization	Prof. Dr. Anne Lauber-Rönsberg (office.lauber-roensberg@tu-dresden.de)
Learning goals	Upon completion of the module, students will possess the competence to independently work on complex questions in the field of intellectual property law as well as competition and antitrust law using jurisprudential methods, and will be able to assess their industry-specific relevance for legal practice. They will have gained an overview over current research questions in intellectual property law in the examined subfields and have studied profoundly the literature and case law on a selected research topic.	
Content	The contents of the module cover specialized issues arising with regard to certain industries, for instance the pharmaceutical industry, film or fashion industry, in the field of intellectual property and the corresponding ancillary fields, such as competition and antitrust law. Furthermore, references to the fundamentals of other subfields of intellectual property and data law are part of the content of the module.	
Teaching and learning methods	2 hours per week (SWS) seminar, self-study. In accordance to § 6 paragraph 7 of the study regulations, the participation in the seminar is limited to 15 participants.
