

Master of Science (M.Sc.) (m/w/d) Start 2027 Standort Dresden (STAR)

Education and Training

We help the world run better

At SAP, we keep it simple: you bring your best to us, and we'll bring out the best in you. We're builders touching over 20 industries and 80% of global commerce, and we need your unique talents to help shape what's next. The work is challenging – but it matters. You'll find a place where you can be yourself, prioritize your wellbeing, and truly belong. What's in it for you? Constant learning, skill growth, great benefits, and a team that wants you to grow and succeed.

What you'll do

The program begins on March 1, 2027, with a comprehensive five-week onboarding program. During this time, you'll get to know SAP, your fellow STAR participants, and our technologies while developing both your technical and personal skills. Throughout the two-year program, you will rotate through four different departments (one rotation per semester). You can choose your rotations based on your personal interests and career goals. While completing your master's degree at TU Dresden, you will complete your practical assignments at SAP Dresden. Thanks to flexible working hours and hybrid work models, your studies and work can be combined seamlessly. You will work an average of 20 hours per week, with a schedule that can be adapted to your university timetable together with your department. Towards the end of your studies, you'll have the opportunity to write your master's thesis at SAP in close collaboration with your academic supervisor. In addition, you'll benefit from a wide range of learning and development opportunities to support your professional and personal growth.

What you'll bring

- Bachelor's degree with a minimum grade average of 2.5
- Admission to or enrollment in a master's program at TU Dresden (starting in October 2026 or March 2027) in one of the following study programs:
 - Computer Science
 - Computational Modeling and Simulation
 - Technomathematics
