

Think big!

Praktikum / Internship – Software Engineering in Dresden & USA

If you are an excellent student who loves to code this may be the right internship for you. You have a strong interest in audio, video, quality engineering and/or big data analysis, and are interested in working abroad and getting to know new people and other cultures?

Then you are the perfect candidate for our internship exchange program in Dresden and one of our locations in the USA (Santa Barbara, San Francisco or Jersey City)

Within a five-months internship at Citrix GetGo, you will start working in Dresden with experts on multichannel audio/video capture and processing for Virtual Reality applications and/or big data analysis required for data-driven decision making. After 2-3 months you will continue the internship program in one of our software engineering hubs in the USA for 8-12 weeks.

If you are interested in this opportunity please send us your resume, a cover letter, your university transcripts/grades and any other references that you feel may be of interest to us to find out that you are the right person for this internship opportunity.

We look forward to receiving your application to
careers.germany@citrix.com

Position Description: Quality Engineering, Santa Barbara, USA

The family of GoTo online conferencing products runs on a wide variety of platforms such as Mac, Windows, iOS, Android as well as in the browser. Testing audio, functionality, and interoperability automatically across so many systems in an end-to-end audio chain including our high-performance servers running in the cloud is a challenging task. Your task will be to support the Quality Engineering team to set up and extend our test automation tools and frameworks for this complex and distributed system in order to maintain the high quality of our software.

Skills:

Java, Python, Selenium, virtualization, docker, distributed systems, networks
