

INTERNSHIP (M/F) MOBILE ENTERPRISE SOLUTIONS DRESDEN

We offer our customers a wide range of technology services from professional software development up to certified testing services. We rely on leading, marketable technologies that enable the development and quality assurance of cross-platform systems at that.

YOUR TASKS

- development of mobile software with iOS or Android
- design of prototypes within mobile development
- support for complex mobile application development
- technical conception and customer interaction
- development of innovative mobile solutions

YOUR PROFILE

- at least one year experience with mobile development in iOS or Android
- basic knowledge of software architectures for mobile development
- basic knowledge of frameworks and the integration of web services for mobile development
- understanding and interest for economic and technical relationships, especially in mobile themes like quality assurance
- very good English skills in speech and writing
- ideally basic German skills

Personally you convince as a motivated, reliable team player and as a competent partner for our prestigious customers. Your way of working is characterized by high analytical expertise for solution approaches and customer orientation. You enjoy the training in new and innovative technologies. To get the most of your internship period it should last at least 6 months.

YOUR CHANCE

If you are looking for new challenges, varied projects and responsibilities, then contact us specifying the password "internship_MES" with your comprehensive application including the completed application form to jobs@t-systems-mms.com.

T-SYSTEMS MULTIMEDIA SOLUTIONS

offers challenging and interesting tasks and with motivated and creative employees a pleasant working environment in an open corporate culture. We create the best conditions for your career in the digital business and social ecosystem with a flexible working time model, further training program, flat hierarchies and diverse, innovative topics.

Our aim is to reconcile professional fulfillment and family. Therefore we would like to encourage women to apply. Equality is an important issue for us, which is why we preferentially hire people with disabilities, if they are equally professionally qualified.

WE ARE LOOKING FORWARD FOR YOUR APPLICATION
