Module name	Foreign language A2 - Japanese
Module number	INF-25-LN-A2-J
Responsible lecturer	Ute Meyer ute.meyer@tu-dresden.de
Qualification objectives	Students have basic communicative competence in Japanese at level A2 of the Common European Framework of Reference for Languages. Students can slowly and clearly articulate concrete information on everyday topics and understand simple and short texts relating to everyday and professional experiences in terms of syntax, semantics, lexis and morphology, provided that the vocabulary is limited to frequently occurring and internationally understandable words. They can use simple phrases and sentences to describe their environment orally and in writing and can largely follow short, simple conversations and very simple presentations and respond appropriately if they are familiar with the topic.
Content	Contents of the module in Japanese are simple texts on everyday situations/concrete topics, especially in a university environment, simple presentations/original documents - for example announcements/interviews/short audio and video sequences - on this topic, development of relevant reading and listening strategies, development of simple grammatical structures and appropriate vocabulary as well as exercises on automation in various forms of work and with different media.
Teaching and learning methods	The module comprises language courses of 4 SWS and self-study.
Prerequisites for participation	Japanese language skills at level A1 of the Common European Framework of Reference for Languages are required.
Applicability	The module is a compulsory elective module of the General Qualification in the Diploma degree program in Computer Science in the foundation course, which must be selected in accordance with the annex 1 to the examination regulations. In the Bachelor's degree course in Computer Science, the module is a compulsory elective module of the General Qualification on, which must be selected in accordance with the annex to the examination regulations. In the Bachelor's degree program in Applied Computer Science, the module is a compulsory elective module of the General Qualification, which must be selected in accordance with the annex to the examination regulations. In the Master's degree program in Computer Science, the module is a compulsory elective module of the General Qualification, which must be selected in accordance with Annex 1 to the Examination Regulations. The module cannot be selected in the Master's degree program in Computer Science if this module or a module with essentially the same content from a degree program in which the admission requirements according to Section 3 of the study regulations

	have already been met has already been completed. The module dul creates the prerequisites for the modules listed under prerequisites for participation.
Requirements for earning credit points	The credit points are earned if the module examination is passed. The module examination consists of a language examination lasting 105 minutes.
Credit points and grades	5 credit points can be earned through the module. The module grade corresponds to the grade of the examination.
Module frequency	The module is offered every semester.
Workload	The total workload is 150 hours.
Module duration	The module comprises one semester.
