

27TH INTERNATIONAL DRESDEN LIGHTWEIGHT ENGINEERING SYMPOSIUM

Neutral Lightweight Engineering
Resilience through Technological Sovereignty

PARTNERLAND INDIA

June 13th – 14th, 2024

MESSE DRESDEN
Messering 7, Dresden
Germany

Join the 27th International Dresden Lightweight Engineering Symposium, co-organized by the Akademischer Club Leichtbau (ACL) e.V. and the Institute for Lightweight Engineering and Polymer Technology (ILK) of TU Dresden. Over 350 international experts, mainly from Europe and India, will gather to explore the interdisciplinary facets of lightweight design. This symposium will be a hub for cutting-edge research and development, facilitating discussions on the future of neutral lightweight engineering and its impact on the circular economy. Don't miss the opportunity to engage and network with prominent representatives from science, industry, politics and society. Be part of the discussion as international pioneers gather in Dresden to drive innovation in lightweight engineering through the plenary and nine technical sessions covering the entire development chain.

Join us in shaping the future of lightweighting and strengthening global partnerships.

As an Indian industry leader, you can not only attend the symposium but also showcase your products, processes, services, projects and advancements at the accompanying trade exhibition. Standard exhibitor packages with pricing details are available on the event website, with custom packages offered upon request. Explore all the opportunities of the accompanying exhibition in an individual consultation and take advantage of the exhibition to highlight your developments and innovations.

In addition, we are pleased to announce that the Early Bird rate is available for participants from India until the event date. Indian participants will receive a voucher after prior notification via email.
