

Dear students of the Faculty of Mechanical Engineering,

today there is a mail "out of order", because there is a pleasing new development. A big problem of the last weeks was the discontinuation of the electrical engineering practical exercise. Many of you need this to be able to do the PO transfer in a regulated way.

We have therefore decided to generate a digital replacement service in the Opal/Onyx.

At the moment, we're still busy with programming the questions at Magnetofluidynamics - it's not a real practical exercise, of course, but at least a course that tests the required knowledge.

So that we can also plan, it would be good if you would register your interest under

<https://bildungsportal.sachsen.de/opal/auth/RepositoryEntry/24347312132/CourseNode/91449070526132>

in the corresponding Opal course. We will then keep you informed about the process and the "experiments" via the message pages. Start of the first "experiment" will probably be in week 26, "experiments" 2 and 3 will follow in week 27 and by 12.07. you should have completed everything.

So far for now.

Stay healthy!

Stefan Odenbach
