Stefan Odenbach  
Dean of Studies Mechanical Engineering, Textile and Confection Technology

Dresden, 20. Mai 2022

Dear students of the Faculty of Mechanical Engineering,

everywhere you look you notice the easing of the Corona crisis and the reduced density of info mails also suggests that things are getting back to normal. But every now and then there is information that is worth passing on and that's why today we have another email for Friday evening.

As we are already in the middle of the semester, the preparation for the examination period is slowly beginning and the first important piece of information is the fact that there is an **advance publication of the examination dates!** This can be found at <https://tud.link/3513> and should certainly be helpful when planning the exam period!

In this context it is very important: for the "**Belegarbeit Maschinenelemente**" (MW-MB-14, Grundstudium 4. Semester bzw. Nach- und Wiederholer) an early enrolment is running since Monday, 16.05. until Friday, 27.05.2022. Those who are concerned should take care not to miss the deadline!

With a view to the examination period and at the same time with a look at the practice rooms, I would like to point out once again that the normalisation of teaching also means that you absolutely have to take care of things like exercises in presence again. I am very concerned about the current **low participation in practice sessions** in many subjects - you absolutely need these exercises to be successful in the exams at the end of the semester!

Finally, a reminder about **TUD Campus Classics** ([www.tud-campusclassics.de](http://www.tud-campusclassics.de)). The raffle for the free passenger places is running! What do you have to do? On the website there is a registration for the co-driver raffle, just fill it out and wait - in a few minutes the emails will go out to this week's winners ;-).

So much for today, enjoy the beautiful weather and the teaching in presence and stay healthy!

Stefan Odenbach
