Prof. Dr. rer. nat. habil.
Stefan Odenbach
Dean of Mechanical Engineering, Textile and Confection Technology

Dresden, November 18, 2022

Dear students of the Faculty of Mechanical Engineering,

the 90th newsletter since March 2020, and this time with only two weeks gap to the last newsletter, because there are some appointments we have to announce briefly:

- Only until 30.11.22 there are **exam enrollments** for a few subjects in which special exam performances are available. This concerns: the test in Machine Elements, the preliminary examination in MW-MB-ET-01, the assignment in MW-MB-LRT-34 as well as the examination in Personality Psychology, which occurs in various catalog modules.
- Already with a view to the examination period and scheduling in these months, there are the **advance publications of the examination dates** for WiSe 2022/23 at <https://tud.link/3513>.
- And then I had already called some time ago to nominate events from MW for the **e-learning jewel of the TUD** (<https://tud.link/brod>). Now the voting is running (until 30.11.22, so it is quite urgent) and two projects from MW are up for vote: the **Technical Thermodynamics** from the basic studies of Mrs. Prof. Breitkopf and the **Beam and Surface Structures** in the main studies of Mr. Dr. Ehrenhofer. Voting is possible until 30.11.22 via the corresponding Opal page (takes 30sec. - I already voted...) at <https://tud.link/hc5u>. It would be great if many people would vote here and our projects from mechanical Engineering would be at the top in the end. So log in to Opal quickly and get it done!

That's it for today, but since two appointment things are included it was necessary for today. Now I wish you all a not too cold weekend, have fun with the first snow and stay healthy!

Stefan Odenbach
