Stefan Odenbach
Dean of Mechanical Engineering, Textile and Confection Technology

Dresden, December 21, 2022

Dear students of the Faculty of Mechanical Engineering,

tonight's evening mail is essentially a mail to close the year. However, there are a few things that are important with an eye on the rest of the semester and thus with an eye on 2023:

- First of all, and this is encouraging, it appears that the transition from HIS to Selma is going very well so far. Nevertheless, once you have received the info that you have been transferred to the new system, you should briefly check that all data has arrived properly.
- Then already once as an advance notice: from 09.01.2023 the enrollment for the examination period in WiSem22/23 runs.
- And in direct connection with this is the fact that as of today the detailed exam planning, i.e. .i.e. exam dates incl. time and room are available at <https://tud.link/3513>. I.e. one can enter now correctly into the planning of the examination period.

That's it for today and also for this year. I wish you all a Merry Christmas and a good transition into a hopefully more peaceful and overall beautiful New Year 2023.

Yours

Stefan Odenbach
