Stefan Odenbach
Dean of Mechanical Engineering, Textile and Confection Technology

Dresden, January 13, 2023

Dear students of the Faculty of Mechanical Engineering,

first of all - even though a few days have already passed in 2023 - I would like to wish you all a happy, healthy and, above all, peaceful New Year. Coupled, of course, with the wish that you will achieve maximum success in the examination periods of this year!

And that brings us right to the important notes for today's mail:

- The registration for the exams runs until 22.01.2023! And for the freshmen: on 19.01.2023 I will tell you more about the exams in the lecture "Ingenieure exzellenten Rufs".
- When registering for the exams, many of you will have to register via Selma for the first time - if you have any problems, please contact the Examinations Office directly. Only there you can be helped!
- Then a small request: you will have received links to the teaching evaluation in many lectures. I know nobody likes to do online surveys anymore, but evaluation is important and it would be super if you would take the time.

That's it for today - and I will finally do what I promised (and did) three months ago and then simply forgot with the following 3 mails: This mail will now also go online as a podcast: at <https://spoti.fi/3rM07Tf> on Spotify and at Castbox via https://bit.ly/Studiendekan-On-AIR_castbox you can get the info (hopefully regularly from now on) directly to your ear. What has also landed there is the information from the study commission mechanical engineering from last Wednesday...

And now: have a nice weekend

Yours

Stefan Odenbach
