Stefan Odenbach
Dean of Studies Mechanical Engineering, Textile and Confection Technology

Dresden, July 14, 2023

Dear students of the Faculty of Mechanical Engineering,

and now the semester's lecture period is already over. It has become hot outside, not exactly the ideal weather for exam preparation. But even that can be solved - I remember darkly an exam preparation for numerical mathematics, which we did in Munich at a lake - the biggest problem at the exam was then the sunburn, which was upset that he had to come into contact with a shirt... So something like that is also possible and basically this mail serves to wish you

GOOD LUCK

for the exam period!

Besides this most important point of today's mail, a few more notes:

- Please keep checking the **exam dates for the summer semester 2023**, which can be found at <https://tud.link/3513>. There are still changes to reduce overlaps, i.e. you should check regularly if anything has changed, if necessary...
- The second item is an announcement: Professors Breilkopf and Buchmüller are organizing a **summer school** on 17./18.8.23 that will focus on looking at technology from a decidedly socially and ecologically sustainable perspective. For those interested, details on T*ECO*LOGIES can be found at <https://tud.link/1uw0>.
- And one more hint - in many subjects (e.g. also in MAT) **tutors are still needed for the exercises in the coming semester**. If you feel like it: contact the chairs promptly! (In our case simply send an email to me).

That's it for today - the corresponding podcast will be online later at <https://spoti.fi/3rM07Tf> on Spotify and on Castbox via https://bit.ly/Studiendekan-On-AIR_castbox.
