Dean of Studies Mechanical Engineering, Textile and Clothing Technology

Dresden, April 12, 2024

Dear students of the Faculty of Mechanical Engineering,

welcome to summer semester 2024 - that could be the title of this email. And this semester has got off to a truly summery start! So I can really open this email by wishing you maximum success and maximum fun this semester. As a rule, however, maximum success will only be achieved if you keep certain things in mind - as always:

- Now that all the grades from the last examination period are slowly becoming available, I would like to point out once again that it always makes sense (and especially if something didn't work out) to take advantage of the **examination review!**
- And if there are any problems with the course of your studies - and this should also be pointed out once again - it makes sense to contact the Examinations Office as early as possible and get advice! The sooner we know about problems, the better we can help!
- On Monday, the study committees will meet to review the catalog modules and the final catalogs should be available at <https://tud.link/g29f> by the end of next week. Please note that only courses that are listed in the catalogs will actually count for the catalogs!
- And I would like to point out well in advance that the planning structure for the examination dates for the coming examination period will probably be available in mid-May - but I will point this out again in due course.
- Last but not least, a note on events: The new **lecture series (Un)healthy Relationships in the Anthropocene** (<https://tud.link/tz4f>) has already started on April 9, 2024 and contains numerous interesting contributions - there will certainly be something there that should interest many of you!

And then a reminder about the **Kummerkasten** (kummerkasten-mw@tu-dresden.de): This is a place where you can express your worries and problems about studying, and can be sure that only I will have access to it. And you can also express your concerns here outside of the official channels, i.e. also from a "non-TU" e-mail account.

In the **Dean of Studies on Air**, this mail should then also be available again as a podcast at <https://spoti.fi/3rM07Tf> on Spotify or on Castbox via https://bit.ly/Studiendekan-On-AIR_castbox.
