

Funding Programme Internationalization

Annex „International scientific event“

Applicant and details concerning the activity

Academic Title/ Name

Titel of the activity

Category of the activity

- International Konferenz
- International Meeting
- Summer school

Time frame

Details concerning the activity

Please explain how your project is embedded in the (strategic) partnership work beyond the mere participation of international guests (scientists, students).

What sustainable effects do you expect your project will generate on an international level and how will that profitably strengthen the internationalization of the TU Dresden?

Have you or will you apply for other third party funding (e.g. DFG proposal „International scientific events“) to financially support your project? Please enclose appropriate evidence or explain why the acquisition of further funding is not an option for your project.

Please note:

- Please note that the funding program internationalization can only provide partial funding for your project. It is essential that the professorship/ institute contributes its own funds and/or applies for third party funding to support the project.
- A detailed cost calculation explaining all costs incurred, their basis, funds that you have available, participant fees (if applicable) and third party funds raised or applied for must be enclosed with the application documents. Please indicate which items of the calculation total costs are being applied for in the funding program internationalization.
- By signing this form, you confirm that you will comply with the requirements above. There is no entitlement to funding. Upon approval, all guidelines and regulations applicable at TU Dresden must be complied with.
