THE PLANNING PENTAGON

The writing technique “planning pentagon” helps you planning the content of your work. It guides you in thinking about which sub topics need more focusing on. On this basis you can build a first structure, sort the literature towards the corners of the pentagon, write an exposé, create a working schedule or think about each corner aspect in depth.

When planning the content of your work it can help to ask yourself these five questions:

1. What do I want to know? (Question)
2. How do I want to approach it? (Method)
3. What will I use as guidance? (Theories, term, concepts)
4. What do I work with? (Materials)
5. What am I expecting? (Working hypotheses)

The following model shows how these questions are connected. If one corner of the pentagon is changed, it will likely influence the other corners.

In dependence on:

Further information on our support services, writing advice, workshops, writing marathon, etc. on our website: www.tu-dresden.de/deinstituderfolg/szd

THE PLANNING PENTAGON

The writing technique "planning pentagon" helps you planning the content of your work. It guides you in thinking about which sub topics need more focusing on. On this basis you can build a first structure, sort the literature towards the corners of the pentagon, write an exposé, create a working schedule or think about each corner aspect in depth.

When planning the content of your work it can help to ask yourself these five questions:

1. What do I want to know? (Question)
2. How do I want to approach it? (Method)
3. What will I use as guidance? (Theories, term, concepts)
4. What do I work with? (Materials)
5. What am I expecting? (Working hypotheses)

The following model shows how these questions are connected. If one corner of the pentagon is changed, it will likely influence the other corners.
