

The Institute of Anatomy Dresden (Director Prof. Mirko HH Schmidt) focuses on the human body in research and education. In particular, we study the brain and apply advanced neuroscientific techniques to understand the central nerve system and its diseases in order to contribute to the cure of patients.

Currently, we are recruiting

Postdoctoral research fellows (f/m/x)

in full time positions, initially, for a duration of 24 months but with the possibility of extension and even tenure upon a positive evaluation. Salary is according to the TV-L conditions and depends on your experience.

In the state-of-the-art life science research performed at the Institute of Anatomy you will focus on one of our major topics, i.e., brain tumours, neurobiology or neurological diseases. You will have access to our technical platforms and the possibility (but not necessity) to establish your own research profile. Additionally, you will participate in the anatomical education of students of medicine and dentistry. Previous experience in teaching is **not** required as you will be trained by our experienced docent team however, a basic knowledge in German language is mandatory. This job offers you a promising future perspective with flexible working hours to guarantee work-life-balance and your career is supported at any stage (e.g., to habilitate or become specialist in anatomy, group leader, professor etc.).

Your profile:

- Successful studies of one of the life sciences
- Required research knowledge in biochemistry, cell biology, molecular biology or the neurosciences
- Optional research knowledge in neurooncology, neurological diseases, neural stem cells or blood vessels
- Experience in writing peer-reviewed papers and acquisition of extramural funds
- Knowledge in German and English language
- Social competence, willingness to work in a team, independence, flexibility
- Basic computer skills

We offer:

- Research in the highly volatile environment of the excellence university Dresden
- A long term career perspective upon passing an adequate qualification period
- Salary according to your experience
- Individual education and training to advance your Career
- Implementation of your own ideas in an innovative Team
- Child care through partnerships with nearby children's institutions
- Benefit from prevention offers and fitness courses in our health center Carus Vital
- A job ticket for public transport in Dresden and the surrounding area

Please send us your application documents (incl. cover letter, CV, contact data of 2 referees and graduation documents from school, studies and theses) as one single pdf. Application of women is appreciated. Disabled persons with equal qualification will be preferred.

We kindly ask you to apply preferably via our online form ([online-form](#)) to make the selection process faster and more effective. Of course, we also consider your written application without any disadvantages. We look forward to receiving your application online referring to registration number **ANA0920433** or via mail to anatomie@mailbox.tu-dresden.de.
