Technische Universität Dresden (TUD), as a University of Excellence, is one of the leading and most dynamic research institutions in the country. As an important part, the Faculty of Medicine and the University Hospital Dresden work closely together in partnership and are committed to excellence in high-performance medicine, medical research and teaching, and patient care for the entire region. The University Medicine Dresden sees itself as a modern employer and offers attractive working conditions to all employees in teaching, research and patient care, technology and administration and thus promotes and develops their potential. TUD embodies a university culture that is characterized by cosmopolitanism, mutual appreciation, thriving innovation and active participation. For TUD diversity is an essential feature and a quality criterion of an excellent university. Accordingly, we welcome all applicants who would like to commit themselves, their achievements and productivity to the success of the whole institution.

The Carl Gustav Carus Faculty of Medicine and the University Hospital Carl Gustav Carus of Technische Universität Dresden invite applications for the

**Chair (W3) of Nuclear Medicine**

to be filled as of October 1, 2024.

The chair is associated with the head of the Department of Nuclear Medicine. The Department of Nuclear Medicine at Dresden University Hospital is of outstanding importance both for university patient care and for research on campus, especially in the oncological field. It has a ward with 15 beds for radionuclide therapy, for diagnostics four double-head gamma cameras (including SPECT/CT) as well as a PET/CT and access to a PET/MRI. As the jobholder, you will cooperate closely with the MVZ for Nuclear Medicine located on campus, with the Helmholtz Centre Dresden - Rossendorf and its Institute for Radiopharmaceutical Cancer Research within the framework of the PET Center, the German Consortium for Translational Cancer Research (DKTK) Dresden as well as with the National Centre for Tumour Diseases (NCT) Dresden. By filling the chair with your focus on innovative oncological imaging and therapy in nuclear medicine, you will strengthen the clinical-scientific profile of the clinic, the research focus on oncology of the Faculty of Medicine as well as the networking with oncological clinics on campus as well as nationwide, e.g. within the NCT/UCC. We are pleased that you will inspire our students with your teaching concepts for your subject and welcome your commitment to the promotion and training of the next generation of clinical scientists as well as academic self-administration.

Ideally, you as the future jobholder are already known nationally and internationally as a research personality in nuclear medicine and have corresponding experience in the acquisition of third-party funding as well as relevant and appropriate management and leadership experience. In addition, you have experience in conducting clinical studies and a successful, internationally visible publication record in nuclear medicine. We place particular emphasis on the area of oncological nuclear medicine research. You have profound expertise in the entire spectrum of nuclear medicine service provision and are familiar with the economic requirements of clinic management in a university environment. Your responsibilities in patient care and in teaching require a very good knowledge of German language.

Appointment requirements include a completed degree in human medicine, a doctorate, habilitation or equivalent achievements, pedagogical aptitude and knowledge of university didactics as well as the specialist qualification for nuclear medicine. The requirements for the granting of a further training authorization in the specialist competence in nuclear medicine by the Saxon State Medical Association must be fulfilled. Applicants must fulfill the employment qualification requirements of § 58 of the Act on the Autonomy of Institutions of Higher Education in the Free State of Saxony (SächsHSFG).

The employment of professors with medical tasks is generally carried out within the framework of non-tariff employment contracts with basic remuneration as well as performance and success-dependent remuneration components.

The Faculty of Medicine strives to employ more women in academia and research. We therefore expressly encourage women to apply. The University is a certified family-friendly university and offers a Dual Career Service. We welcome applications from candidates with disabilities. If multiple candidates prove to be equally qualified, those with disabilities or with equivalent status pursuant to the German Social Code IX (SGB IX) will receive priority for employment. If you have any questions about these topics, please contact the Equal Opportunities Officer of the Faculty of Medicine (Dr. Valtink, phone +49 351-458-6124) and the representative for persons with disabilities of the Faculty of Medicine (Ms Vogelbusch, +49 351-458-12127).
