Technische Universität Dresden (TUD), as a University of Excellence, is one of the leading and most dynamic research institutions in Germany. As an important part, the Faculty of Medicine and the University Hospital Dresden work closely together in partnership and are committed to excellence in high-performance medicine, medical research and teaching as well as patient care for the entire region. The University Medicine Dresden sees itself as a modern employer and offers attractive working conditions to all employees in teaching, research and patient care, technology and administration and thus promotes and develops their potential. TUD embodies a university culture that is characterized by cosmopolitanism, mutual appreciation, thriving innovation and active participation. For TUD diversity is an essential feature and a quality criterion of an excellent university. Accordingly, we welcome all applicants who would like to commit themselves, their achievements and productivity to the success of the whole institution.

The Carl Gustav Carus Faculty of Medicine and the University Hospital Carl Gustav Carus of Technische Universität Dresden invite applications for the

**Chair (W3) of Orthopaedic Surgery**

to be filled as of January 1, 2025.

You (m/f/x) will represent the field of Orthopaedic Surgery in its entirety in clinical practice, research, and teaching. The chair is associated with the position of one of the managing or medical directors at the University Center for Orthopaedics, Trauma and Plastic Surgery (OUPC) at the University Hospital Dresden. The OUPC is of outstanding importance both for the medical care of patients with all diseases and injuries of the musculoskeletal system as well as for musculoskeletal research and teaching on the university campus. At the center, more than 7,000 surgical procedures covering the entire musculoskeletal spectrum are carried out annually in nine orthopedic and trauma sections and a department for plastic and hand surgery. You cooperate closely with partner institutions in other surgical or medical fields as well as the oncological centers (NCT/UCC) with close involvement in other interdisciplinary university centers.

With your focus on innovative techniques in joint-preserving surgery and lower limb arthroplasty, you will strengthen the clinical-scientific profile at the OUPC and contribute to the continuation of the successful Dresden academic musculoskeletal leadership model, characterized by equal representation of the orthopaedic and trauma specialty through two chair holders. In student training, you are responsible for teaching orthopedics at the Dresden faculty, including the model study program Chemnitz and you have a keen interest to support academic self-administration.

As a future jobholder, you have an internationally recognized individual orthopaedic research profile, that is visible through an excellent publication activity and corresponding experience in the acquisition of third-party funding. Ideally, you have profound expertise in the entire field of musculoskeletal disorders with a focus on joint surgery. You are familiar with the economic requirements of hospital management in a university environment.

Appointment requirements include a completed degree in human medicine, a doctorate, habilitation or equivalent achievements, a subspecialty certificate in special orthopedic surgery in addition to the specialist qualification in orthopedics and trauma surgery, as well as university didactic knowledge and aptitude. As an essential requirement, we expect full identification with the governance and management concept of our OUPC, i.e. the distinct willingness and ability of integration into a shared leadership model. Applicants must fulfill the employment qualification requirements of § 59 of the Institutions of Higher Education Act in the Free State of Saxony (SächsHSG).

The employment of professors with medical tasks is generally carried out within the framework of non-tariff employment contracts with basic remuneration as well as performance and success-dependent remuneration components.
The Faculty of Medicine strives to employ more women professors in academia and research. We therefore expressly encourage women to apply. The University is a certified family-friendly university and offers a Dual Career Service. We welcome applications from candidates with disabilities. If multiple candidates prove to be equally qualified, those with disabilities or with equivalent status pursuant to the German Social Code IX (SGB IX) will receive priority for employment. If you have any questions about these topics, please contact the Equal Opportunities Officer of the Faculty of Medicine (Dr. Valtink, phone +49351-458-16124) and the representative for persons with disabilities of the Faculty of Medicine (Ms Vogelbusch, +49351-458-12127).

Please send your application by March 3th, 2024 in electronic form in a single PDF file or in hardcopy to Dekanin der Medizinischen Fakultät Carl Gustav Carus der Technischen Universität Dresden, Frau Prof. Dr. med. Dr. Esther Troost, Fetscherstr. 74, 01307 Dresden (medberufungen@mailbox.tu-dresden.de). For further details concerning the required application documents please see the homepage of the Faculty of Medicine or contact the dean’s office (Dr. Janetzky, +49351-458-3356).
