

[Master Thesis/Diploma]

We are searching for:

- Dedicated and interested students who like to work independently and want to write their **Master Thesis or Diploma**
- Your background:
Chemistry, Material Science, Chemical Engineering, Textile Engineering or similar subjects

What we offer:

- Work with teams of the project SFB/TRR280 “Design Strategies for Material-Minimised Carbon Reinforced Concrete Structures”
- Development of bioinspired interphases for novel building materials
- Interesting research topics:
Surface modification of glass and carbon fibers according to biological principles, interphase characterization, scanning electron microscopy
- Integration of students into the team and current research projects
