

GPSD 2022 cancelled due to Coronavirus/Covid-19 (as of 31 March 2020)

We are very sorry that we had to cancel the German Probability and Stochastics Days 2020 in Dresden.

This is extremely disappointing for all of us but it is in the best interest of the health of all participants and the public health in general.

Dresden - a unique place where science meets culture

Continuing the series of conferences established in 1993, the 14th German Probability and Statistics Days (GPSD) 2020 are taking place at TU Dresden on 24th - 27th March 2020. Located in the city centre, TU Dresden is a major hub for science and the lead partner of Dresden Concept. TU Dresden is one of Germany's Universities of Excellence since 2012.

The GPSD conferences are organized biannually with the support of the DMV-Fachgruppe Stochastik e.V. In 6 plenary lectures and 14 specialized sections with 14 keynote lectures the GPSD covers the full spectrum of probability, statistics and their applications in physics, biology, finance, insurance and data science. This conference provides an important forum for presenting and discussing the latest developments in the field for both young and senior researchers in Germany, Europe and beyond. A Get Together with Poster session as well as the Conference Dinner will offer great opportunities to have informal discussions, deepen friendships and meet new colleagues.

Dresden is one of Europe's most beautiful cities with a wide range of cultural attractions and great tourist facilities. We hope that you will contribute to this leading conference in probability and statistics - and look forward to welcoming you in Dresden.
