

The **Chair of Cognitive and Clinical Neuroscience** is currently looking for:

Student Assistants (SHK)

Our group investigates neuronal mechanisms underlying the processing of sensory information in the field of interpersonal communication and learning. Various neuropsychological methods are used such as fMRI, TMS, eyetracking, and behavioural experiments. We are looking for motivated and enthusiastic student assistants supporting our research, particularly a combined TMS&fMRI study.

Tasks:

Organisation of participant recruitment and study preparation, participation in data collection and analysis, involvement in conducting fMRI, TMS and behavioural experiments.

We offer:

Comprehensive insight into a cognitive and clinical neuroscience lab, involvement in an international research environment, possibilities for further professional development and methodical competence, flexible working hours.

Requirements:

- Student of psychology, medicine or related field
- Ability to work responsibly and independently
- Ability to work in a team
- Excellent command of German and English
- Favourable:
 - Experience in conducting psychological experiments and data analysis
 - Long-term involvement

The contract of employment is based on the WissZeitVG and is initially limited to three months, with the option of extension. Scheduling of working hours is flexible and can be stipulated.
