Contents and teaching methods

If not, was the workshop too long or too short? Which issues should have been discussed more in detail?

it could have been even longer (maybe 1-2 hours)

-the length was good -less breaks would be great in total so that we would have been done earlier

This one day workshop is quite short. Hopefully, another ~~be~~ complete SPSS course ~~could~~ would be available. ~~to~~ in a longer duration.

Organization and Facilities

Please let us know your comments regarding the organization of this workshop.

'beamed

-everything perfect (enrollment, room, computers)

All is well-organized and convenience

Alltogether I rate this workshop with grade:

What did you like most during the workshop?

content and supervision

The content, organization and the way it was delivered.

individual pace by manuscript, expertise of approachable trainers

THE EXAMPLES USED TO PERFORM THE DIFFERENT EXERCISES

Hand-on exercises

Very nice & helpful trainers; very helpful script

The script is really good and helpful for the future

Crash course in using SPSS. Quickly taught to usable level.

- started with the really basic knowledge about SPSS
so that it was fun to learn everything from

The PC Pool is nice and comfortable. Also, the course's place ~~is~~ is reachable
and really ~~close~~ close to SLUB/another strategic place

What was the most important fact what you have learned during this workshop?

Introduction of SPSS

Usage of SPSS itself.

Data analysis can be tricky: looking at income by gender there was a payment gap.
However, in the scatter plot matrix it could be seen that male
subjects were just older. The group specific regression ~~age-income~~ ~~income~~

HOW TO DEAL EASILY WITH STATISTICS

How to use SPSS to analyze data.

SPSS is manageable :)

How to present Correlation in data

-to not be scared of SPSS in practice

Improving SPSS skill ~~should be~~ is crucial for a better future research & applied sciences.

How could the qualification program be improved to better suit your educational need?

Bibliography data available to read home

Its already very good. Only one suggestion, if the PDF files of the course scripts could also be provided then it will be very good ^{because} the paper scripts could be lost during

I THINK THAT A MORE ADVANCED LEVEL COURSE OF SPSS WILL BE A GOOD OPTION.

Adding a little more of the statistical background
e.g. Two-tailed, Spearman, two-tailed.

perhaps it could go into other features of SPSS e.g. neural nets

it would be great to have advanced SPSS courses based on this one

My research focus on data analysis either qualitative or quantitative. Those play a pivotal role in defining my research purpose & benefit.
