

Supplementary Table 1. Regions throughout the rest of the brain that showed differential BOLD signal for different trial types involving the new trials. Talairach coordinates (x,y,z) for peak activation are given. 19 or more contiguous significant voxels at $P < 0.002$. Emotional photos indicated as “remember” (ER), Neutral photos indicated as “remember” (NR), Emotional photos indicated as “know” (EK), Neutral photos indicated as “know” (NK), Emotional new photos (Enew), Neutral new photos (Enew).

Region	R > K	K > R
Caudate nucleus, Left	(-4,16,1)	
Cingulate gyrus, Left	(-7,-65,13)	
Cingulate gyrus, Right	(17,24,25)	
Inferior parietal, Right	(53,-32,24)	(42,-58,46)
Middle frontal gyrus, Right		(44,12,42)
Postcentral gyrus, Right	(49,-11,20)	
Precentral gyrus, Right	(39,-5,12)	
Superior frontal gyrus, Left	(-8,42,47)
