

Prof. Dr. Masaki Kawano

Name: Prof. Dr. Masaki Kawano

Organization: Department of Chemistry, School of Science, Tokyo Institute of Technology

Profile Weblink: <http://www.chemistry.titech.ac.jp/~kawano/>

Masaki Kawano received his Ph.D. in Coordination Chemistry at Waseda University in 1993. He became Assistant Professor at the same school (1992-1994). He joined as a postdoctoral fellow at the department of Chemistry, University of Wisconsin-Madison (1994-97) under the supervision of Prof. L.F. Dahl, and moved to Tokyo Institute of Technology (1997-2003) to join as a postdoctoral fellow in CREST. Then he moved to the University of Tokyo as a Lecturer (2003-04) where he was promoted to Associate Professor. He moved to Pohang University of Science and Technology as Professor of Division of Advanced Materials Science (2009-2015).

He has been Professor of Department of Chemistry, School of Science, Tokyo Institute of Technology since Sept. 2015.

His research interests include Coordination chemistry, Supramolecular chemistry, In situ chemical crystallography, Crystalline-state photochemistry, ab initio powder X-ray crystallography.

Awards and Scholarships:

2016	Nagase Foundation Award 2016 <i>Nagase Foundation</i>
2015	Yamada Foundation Award 2015 <i>Yamada Foundation</i>
2014	NRF Veteran Research Funding
August 2011	POSTECH Rising Star Award
May 2009	The CSJ Award for Creative Work
September 2008	Chemistry Innovation UT GCOE Lectureship award
September 2002	The 82nd Society of Japan Chemical Society - 17th Special Lecture Award for Young Generation (Osaka)
