Guidelines for the Mounting of First-Aid posters for Providers of First Aid

**Locations**

- Generally next to every first-aid box at a specific location (such as entrance area, next to restrooms or kitchens, etc.)
- If there is no first-aid box, posters should be mounted in the important areas:
  - In the building foyer/entrance area or main staircase
  - At the entrances to workshops/laboratories etc.
  - At least 1x on each floor at a specific location, if there currently isn’t one

**Mounting Instructions**

- The first-aid poster always hangs to the left of the emergency number poster without space in between
- Without first-aid box: Mounting in two A3 frames or in two selfadhesive foil pockets on top edge 1600mm
- With small first-aid boxes (42 x 36 cm): Height of box and frame on upper edge of door signs (usually 1600mm, if necessary align with other elements)
- With large first-aid boxes (55 x 35cm): Height of box and frame on lower edge of door signs (usually 1390 mm, if necessary align with other elements)
- 2x A3 frames, usually with adhesive mounting, or two selfadhesive foil pockets, available from Unit 4.4 blo@mailbox.tu-dresden.de

Guidelines for the Mounting of Defibrillator posters

**Locations**

- Left or right next to the defibrillator in line with its upper edge

**Mounting Instructions**

- Mounting in an A3 frame (adhesive mounting) or in selfadhesive foil pocket (available from Unit 4.4 blo@mailbox.tu-dresden.de)

The Defibrillator poster (A3) is available in printed form from the Occupational Health Services.
