

# Introduction to mathematical/theoretical biology

## General:

- [1] Heinz Bauer. *Wahrscheinlichkeitstheorie und die Grundzüge der Maßtheorie*. Walter de Gruyter, 1978.
- [2] L. Edelstein-Keshet. *Mathematical models in biology*. Random House, New York, 1988.
- [3] Karl Peter Hadeler. *Mathematik für Biologen*. Springer, Heidelberg, 1974.
- [4] R. Iranpour and P. Chacon. *Basic Stochastic Processes, The Mark Kac Lectures*. Macmillan Publishing Company, 1988.
- [5] James Keener and James Sneyd. *Mathematical Physiology*. Springer, Heidelberg, 1998.
- [6] James D. Murray. *Mathematical Biology, II. Spatial Models and Biomedical Applications*. Springer, 2003.
- [7] James D. Murray. *Mathematical Biology, I. An Introduction*. Springer, 2004.
- [8] Adolf Riede. *Mathematik für Biologen*. Vieweg, Braunschweig, 1993.
- [9] Reinhard Schuster. *Grundkurs Biomathematik*. Teubner Studienbücher, Stuttgart, 1995.
- [10] Lee A. Segel. *Modeling Dynamic Phenomena in Molecular and Cellular Biology*. Cambridge University Press, Cambridge, 1984.
- [11] R.B. Shinazi. *Classical and Spatial Stochastic Processes*. Birkhäuser, Boston, 1999.
- [12] Werner Timischl. *Biomathematik*. Springer, Heidelberg, 1995.

## Diffusion:

- [13] Robert B. Banks. *Growth and Diffusion Phenomena*. Springer, 1994.
- [14] Akira Okubo. *Diffusion and ecological problems: Mathematical models*. Springer, 1980.

## Gradients:

- [15] F. Crick. Diffusion in embryogenesis. *nature*, 225, 1970.
- [16] Clyde et al. A self-organizing system of repressor gradients establishes segmental complexity in *Drosophila*. *nature*, 426:849, 2003.
- [17] J. B. Gurdon and P.-Y. Bourillot. Morphogen gradient interpretation. *Nature*, 413:797–803, 2001.
- [18] M. Kerzberg and L. Wolpert. Mechanisms for positional signaling by morphogen transport: a theoretical study. *J. Theor. Biol.*, 191:103–114, 1998.
- [19] K. Kruse, P. Pantazis, T. Bollenbach, F. Jülicher, and M. Gonzalez-Gaitan. Dpp gradient formation by dynamin-dependent endocytosis: receptor trafficking and the diffusion model. *Development*, 131(19):4843–4856, 2004.
- [20] A. D. Lander, Q. Nie, and F. Y. M. Wan. Do morphogen gradients arise by diffusion? *Development*, 2:785–796, 2002.
- [21] H. Meinhardt. *Models of biological pattern formation*. Academic Press, London, 1982.
- [22] Hans Meinhardt. Space-dependent cell determination under the control of a morphogen gradient. *J. Theor. Biol.*, 74:307–321, 1978.
- [23] C. Nüsslein-Volhard. Gradienten als Organisatoren der Embryonalentwicklung. *Spektr. d. Wiss.*, Oct., 1996.

## Turing:

- [24] A. Gierer and H. Meinhardt. A theory of biological pattern formation. *Kybernetik*, 12:3039, 1972.
- [25] M. Isalan, C. Lemerle, and L. Serrano. Engineering gene networks to emulate *drosophila* embryonic pattern formation. *PLoS Biol.*, 3:488–496, 2005.
- [26] A.J. Koch and H. Meinhardt. Biological pattern formation: from basic mechanisms to complex structures. *Rev. Mod. Phys.*, 66:1481–1507, 1994.

- [27] S. Kondo and R. Asai. A reaction-diffusion wave on the skin of the marine anglefish *pomacanthus*. *Nature*, 376:765–768, 1995.
- [28] H. Meinhardt. *Models of biological pattern formation*. Academic Press, 1982.
- [29] A.M. Turing. The chemical basis of morphogenesis. *Philos. Trans. R. Soc. B*, 237:3772, 1952.

## **Oscillations:**

- [30] B. Hess A. Boiteux, A. Goldbeter. Control of oscillating glycolysis of yeast by stochastic, periodic, and steady source of substrate: A model and experimental study. *PNAS*, 72:3829–3833, 1975.
- [31] A. Goldbeter. *Biochemical Oscillations and Cellular Rhythms: The Molecular Bases of Periodic and Chaotic Behaviour*. Cambridge University Press, 1996.
- [32] A. Goldbeter, D. Gonze, G. Houart, J.-C. Leloup, J. Halloy, and G. Dupont. From simple to complex oscillatory behavior in metabolic and genetic networks. *Chaos*, 11:247–256, 2001.
- [33] P. De Koninck and H. Schulman. Sensitivity of cam kinase ii to the frequency of  $ca^{2+}$  oscillations. *Science*, 279:227230, 1998.
- [34] F. Hynne S. Dano, P.G. Soerensen. Sustained oscillations in living cells. *Nature*, 402:320–321, 1999.

## **Self-organization:**

- [35] A. Deutsch and S. Dormann. *Cellular automaton modelling of biological pattern formation*. Birkhauser, Boston, 2004.
- [36] H. Haken. *Synergetics. An introduction*. Springer, Berlin, Heidelberg, New York, 1977.

- [37] E. Jantsch. *The self-organizing universe: scientific and human implications of the emerging paradigm of evolution*. Pergamon Press, Oxford, 1980. Deutsch: Die Selbstorganisation des Universums: vom Urknall zum menschlichen Geist, DTV, München, 1986.
- [38] G. Jetschke. *Mathematik der Selbstorganisation*. Harri Deutsch, Frankfurt, 1989.
- [39] G. Nicolis and I. Prigogine. *Self-organization in nonequilibrium systems*. Wiley, New York, 1977.
- [40] F. Schweitzer, editor. *Self-organization of complex structures – from individual to collective dynamics*, Amsterdam, 1997. Gordon and Breach.

## Networks:

- [41] A.L. Barabasi. *Linked: The New Science of Networks*. Perseus Publishing, Cambridge, 2002.
- [42] T. Ideker and *et al.* Integrated genomic and proteomic analyses of a systematically perturbed metabolic network. *Science*, 292:929–934, 2001.
- [43] B.R. Jasny, L.B. Ray, and *et al.* Special section: Networks in biology. *Science*, 301:1863–1878, 2003.
- [44] H. Jeong, B. Tombor, R. Albert, Z.N. Oltvai, and A.L. Barabasi. The large-scale organization of metabolic networks. *Nature*, 407:651–654, 2000.
- [45] S.A. Kauffman. Metabolic stability and epigenesis in randomly constructed genetic nets. *J. Theor. Biol.*, 22:437–467, 1969.
- [46] T.I. Lee and *et al.* Transcriptional regulatory networks in *saccharomyces cerevisiae*. *Science*, 298:799–804, 2002.
- [47] E. Ravasz, A.L. Somera, D.A. Mongru, Z.N. Oltvai, and A.L. Barabasi. Hierarchical organization of modularity in metabolic networks. *Science*, 297:1551–1555, 2002.
